Fostering Practical Engineers Through Cooperative Problem-Based Learning with Students from Overseas Universities

Sasebo National College of Technology (SNCT) and Xiamen University of Technology (XUT) cooperatively launched a mutual student exchange program in 2005. One of the aims of this program is to educate and train young Japanese engineers who can apply their knowledge and skills fully to work in factories in China. The other aim is to educate and train young Chinese engineers who will acquire not only technological knowledge and skills but also an understanding of the organizational structure and cultural background of Japanese companies. In order to achieve these aims, three main activities have been planned as follows. (1) Exchange program between SNCT and XUT. (2) SNCT faculty visiting Chinese University and Japanese factories operating in China. (3) Holding international forums and students' reporting sessions
