

# General news

*Rubin-*  
**LSST**

Emmanuel Gangler – LSST-France – November 22<sup>th</sup> 2021

# Welcome to our new members !

- **Welcome to:**
  - On this room: Biswajit, Kirill, Roman, Kelian, Justine, Emeric, Denise, Morgan
  - and also: Leander, Gabriele, Martin, Etienne, Thierry, Enya
  - ... More coming next year: Vincent, Didier, Cyrille
- **Some background material:**
  - S. Kahn [Video presentation on Rubin](#) (38 min)
  - An [Introduction to Rubin](#) (PCW Workshop Aug. 2021 59 mins)
  - [Slides](#) and [Report](#) for IN2P3 scientific council (Oct 27<sup>th</sup> 2020)
- **Even if we don't have yet a Code of Conduct** (see Gaëlle's talk)
  - Be kind and respectful of others ; no form of harassment or bullying will be tolerated

# Welcome to our new members !

- **Getting started: don't forget**
  - to **check the starting pages** <https://doc.lsst.eu/>
  - to **register on LSST-L** (for INSU or CEA): still the main mailing list. Use it.
    - Or *LSST-IN2P3-L* (for IN2P3 data rights holders) mailing list. Low trafic.
  - to **register on Slack** [lsst-france](#) and LSSTC (main Rubin Slack)
  - to **join a scientific collaboration**
    - All collaborations are independent
    - For DESC, this is the [join procedure](#), and the [getting started](#) page (for members)
    - Note : **updating Data Rights holder list is more challenging than expected**. Address back enquiries to me!

# News from IN2P3

- **IN2P3 prospectives workshop**
  - **Report** and recommendations for Inflation and Dark Energy:
    - R2: Improve **cosmological exchanges**
      - Cosmological Physics CoPhy GdR under maturation (discussion with INSU)
    - R3: Develop a scientific program enabled by **cross-correlation of probes**.
      - cross-correlation with CMB, but also EUCLID/Rubin data combination
    - R4: Maintain a **program of projects of all scales**, from the largest international projects to mid- and small-scale projects.
      - participation to ZTF II, but also StarDice
    - R5: Support **computing development** for upcoming, data-intensive experiments
      - our implication at CCIN2P3
    - R7: **Complete LSST** and EUCLID as planned and ensure the **scientific return**
      - the scientific return is important here !

# News from IN2P3

- **Renewal of IR grant**
  - Infrastructure de recherche up to ~1M€/yr 2021-2025
- **2 new projects under LSST Master project:**
  - **FINK broker selection by Rubin !** (see Emille's Talk)
  - **ZTF II supported by ANR** award (see tomorrow morning)
- **Our community keeps growing**
  - 2 newly hired CNRS researchers in 2021
    - New openings for 2022 will be known ~Dec. 1<sup>st</sup> ; 8 CR positions in total; newly created "data science" section
    - Rubin-LSST France next priorities for IN2P3: APC, LPC
  - Permanent opening for computer scientist (Ingénieur de recherche) at CC-IN2P3 in 2022
  - New staff joining from other projects
  - Net increase in PhD students ! Now is a great time to start a PhD on Rubin/LSST/DESC !

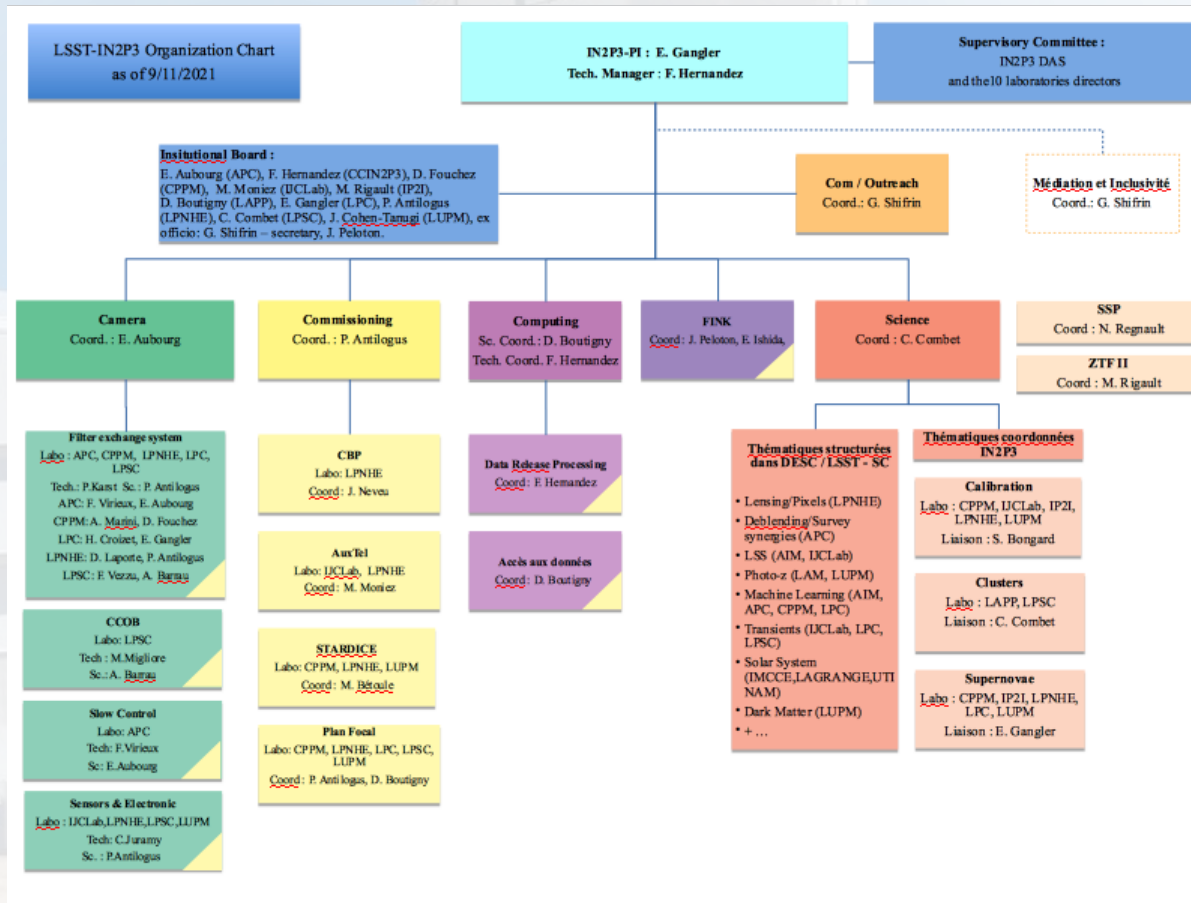

# Internal Rubin-LSST France organization

- **Remarks:**

- Institutional board: IN2P3 coordination
  - Centered on IN2P3 matters
  - + DESC news

- **Hot topics:**

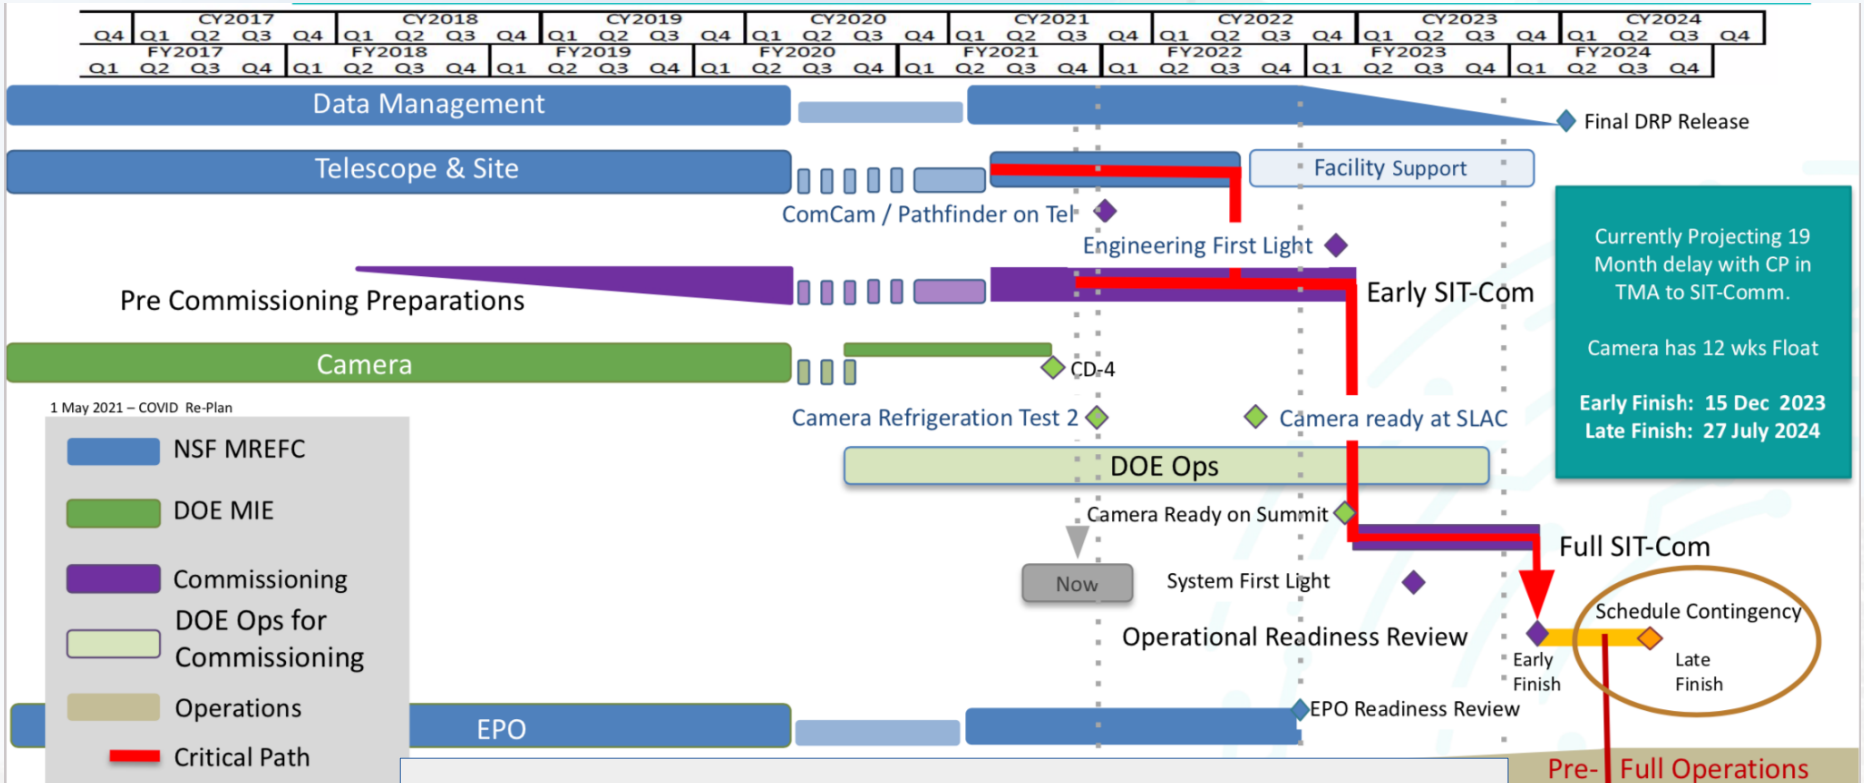

- **Commissioning:** see P. Antilogus talk
- **Computing:** see D. Boutigny talk
- **Science preparation**

# News from Rubin obs. and DESC

# Rubin schedule

- Survey likely start: **April 2024**
- CD4 (DOE): Camera Construction finished
- **Commissioning:**
  - 2022 test data on camera
  - 2023 camera on sky

# Construction status

Dome almost 100% finished

Telescope mount rotation  
(by hand)

ComCam and mirror surrogates  
in storage room  
(by hand)

# Camera Status

LSSTCam entered the *Guinness book of records*:

- Largest lens
- Highest resolution camera

All 6 filters arrived at SLAC

Filter exchange system fully operational  
(more on this next talk)

LSSTCam cryocooling  
successful  
EOtest in progress  
(more on this Tues)

# Commissioning

- **The call :**
  - Rubin Obs. released a call reserved to US and Chile
  - Thanks to good long-standing relations, Chuck Claver asked us to propose contributions
  - Important for us to **contribute before the Data Pre-Release** stage.
- **Big success within IN2P3**
  - 28 researchers
  - ~8 FTE/yr available
  - People available for full-time presence in Chile
- **Topics of interest:**
  - Hardware Calibration (Jeremy Neveu)
  - AuxTel (Marc Moniez)
  - Pixel-level, data quality and on sky calibration (Dominique Boutigny)
  - Object detection, weak lensing and deblending (Cyrille Doux)
  - System Optimization (Alexandre Boucaud)

# Vera C. Rubin Observatory Timeline

## Current On-sky Observing Schedule

**Rubin**  
Observatory

Time

Early System Integration  
& Test w/ComCam

Full System Integration &  
Test w/LSSTCam

Science  
Verification/Validation

3 months

Test ComCam : 11.2021 - 08.2022  
ComCam on Sky : 09.2022 - 01.2023

3 months

LSSTCam test at Chile : 06.2022 - 01.2023  
LSSTCam on Sky : 03.2023 - 09.2023

**Survey 1: Wide Area**  
Template Generation

**Survey 2: Full Depth**  
10-year survey in selected reference fields with external imaging and spectroscopy

**Survey 1: Wide Area**  
Real time Alert Production

2 months

~Apr 2024

# Commissioning

- **How to engage ?**
  - No need to wait for Chuck's answer for starting contribution
  - Most topics already clear on the path forward
- **Pixel-level** is the largest group ;
  - Still needs **internal coordination** (7 labs)
  - Ramping up on expertise
    - Making good use of DESC SAWG group
      - Claire Juramy is now co-convener !
      - **Follow the Confluence page** (for instance : presentation by Yousuke)
    - Current EOTest campaign is a good starter
    - Some data already at CC

Example of bias stability studies

# Data Releases planning

- DP0 = DESC DC2 simulated data
- DP0.1 data available at CC
  - RSP on hold since Bastien's departure
- **DP0.2 will be the CC priority for 2022**
  - Processing with gen3
  - **With DIA**
  - Shared processing test need to be conducted
- **Note : DP data will be available long after the data will be taken**
  - Entry point for SC-level commissioning
- **No alerts (canned) before July 2023**
  - Importance of **DESC Alert TT challenges**

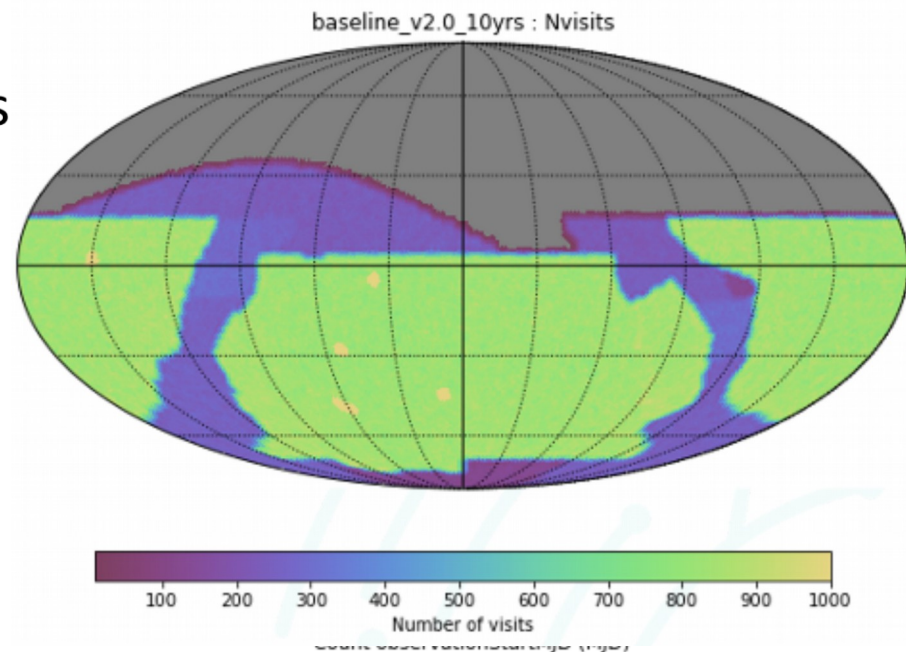

<b>Rubin Baseline Data Release Scenario</b>		Jun 2021	Jun 2022	Jul-Sep 2023	Apr-Jul 2024	Feb-Jul 2025
		<b>DP0.1</b>	<b>DP0.2</b>	<b>DP1</b>	<b>DP2</b>	<b>DR1</b>
<b>Data Product</b>		DC2 Simulated Sky Survey	Reprocessed DC2 Survey	ComCam On-Sky Data	LSSTCam On-Sky Data	LSST First 6 Months Data
Raw Images		<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
DRP Processed Visit Images and Visit Catalogs		<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
DRP Coadded Images		<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
DRP Object and ForcedSource Catalogs		<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
DRP Difference Images and DIASources		<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
DRP ForcedSource Catalogs including DIA outputs		<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
PP Processed Visit Images		<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
PP Difference Images		<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
PP Catalogs (DIASources, DIAObjects, DIAForcedSources)		<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
PP Alerts (Canned)		<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
PP Alerts (Live, Brokered)		<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
PP SSP Catalogs		<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
DRP SSP Catalogs		<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

# SCOC draft phase 1 report: top recommendations

- define WFD footprint using ISM dust extinction
- adopt 1 snap for u-band visits
- obtain pairs of visits with different filters
- continue to explore rolling cadence scenarios

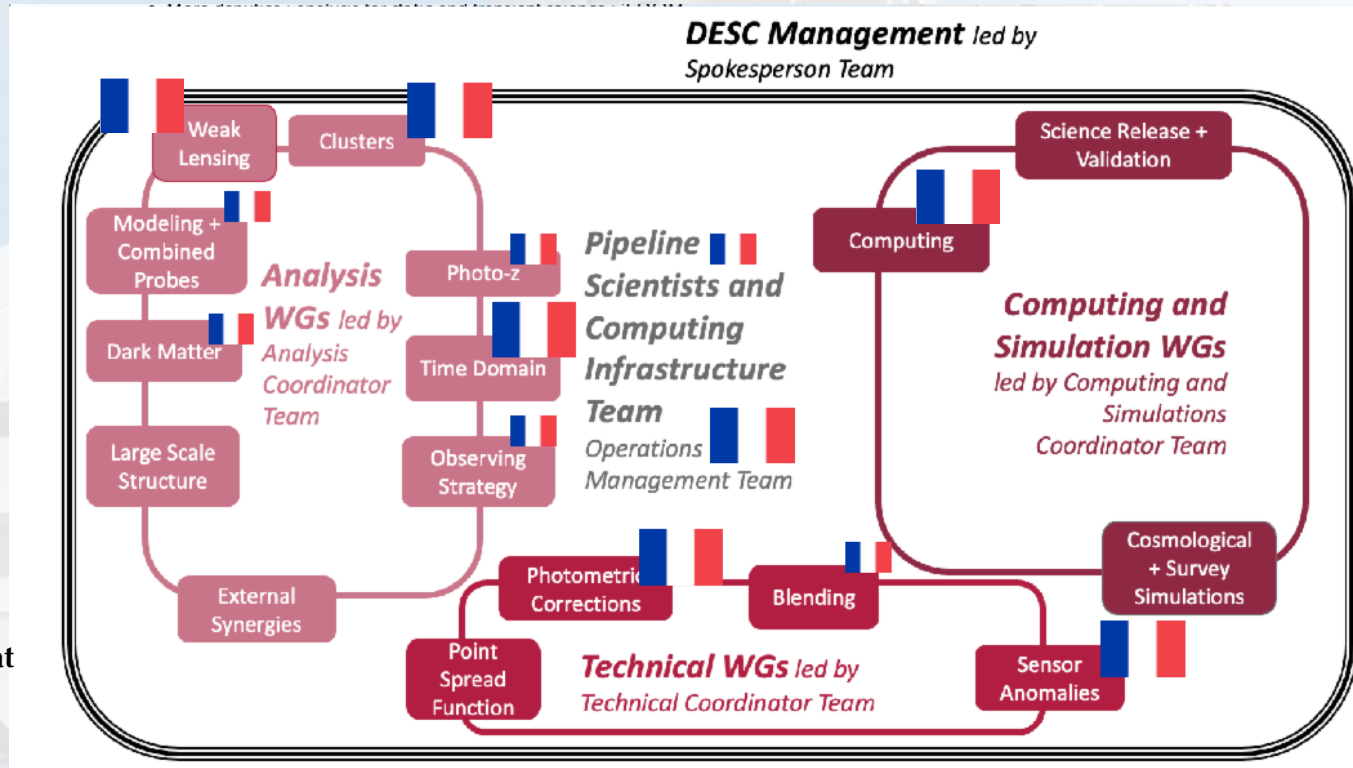

Onward to baseline v3!

DDFs : see talk by Philippe

# DESC news

- **New management since July 2021**
  - Growth of management team
    - More deputies : analysis for static and transient science ; 2 DOM
    - Note : if you have remarks about DESC management, I'm here to listen !
  - Onboarding international in-kind effort
    - Note: Euclid/DESC interest from European partners
  - Answering Rubin calls
    - Commissioning
    - Photo-z
  - **Preparing a Science Plan**
    - Goal is to define and focus on **Key papers at the horizon of DR2**
    - Important for us too ...

 French contribution  
 French leadership

# DESC news

- **Growing French participation**

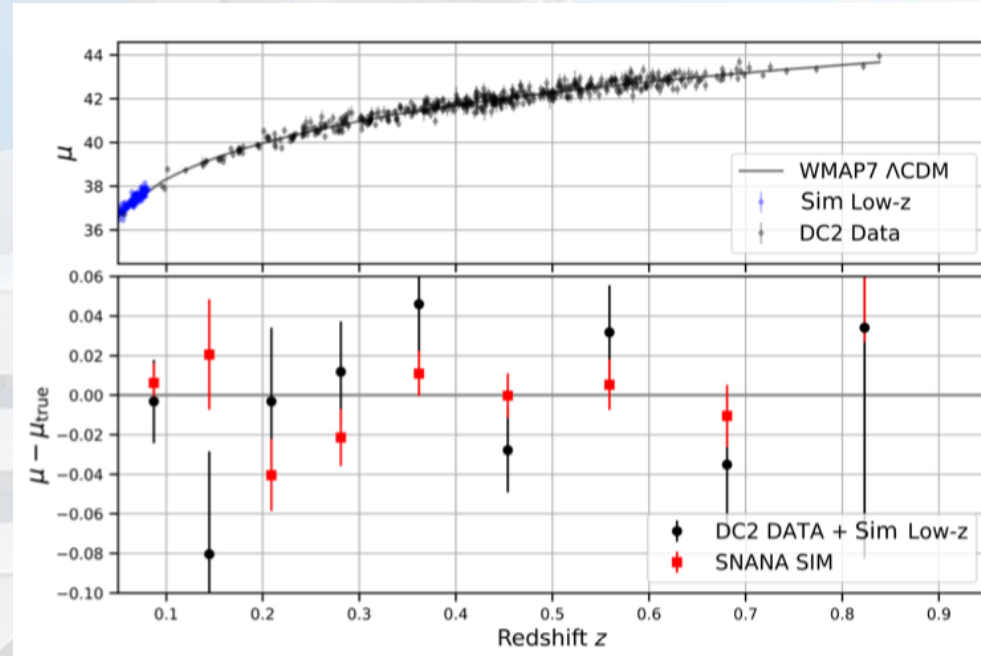

- 108 (+27) members / 1182
  - Includes inactive people (see Membership Revision Policy)
- 32 Full Members / 236
  - Stable... If you contribute  $>\sim 30\%$  of your time to DESC, you should consider becoming Full Member (**juniors are eligible too**)
- 3 Builders / 33
  - Stable (we also have 11 Rubin builders who are also researchers)

- **Service to DESC collaboration**

- Great French presence in nearly all DESC committees
  - Slow decrease on DESC Collaboration Council... Congrats to newly elected members ! (Céline, François)
- French Working Group, Topical Team conveners and PS :
  - gradual shift from SN to Clusters...
    - For now: SAWG, PCWG, Alerts TT and CLMM TT, 2 PS in Time Domain and Clusters
    - -2 conveners in 1 year...

# Supernovae within DESC ?

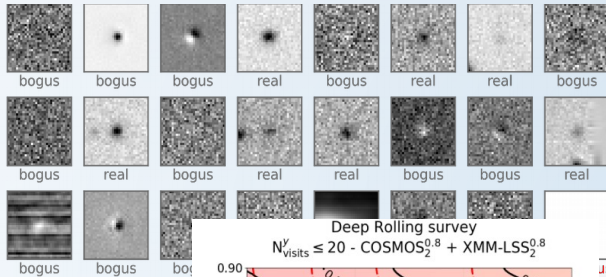

- What is the scientific strategy ?
  - We have **invested a lot in SN cosmology**
    - This is at the core of **ZTF II** participation (a success : ~25 % of our scientific FTE)
    - This is the basis of our ground work on **calibration**
  - Is supernova science within DESC appealing ?
    - Cadence is suboptimal, FoM is calibration-critical  
→ importance of (early) DDFs (see talk by Philippe)
  - Are we investing enough in DESC for Supernova Science ?
- This is a major question for Rubin-LSST France scientific return...

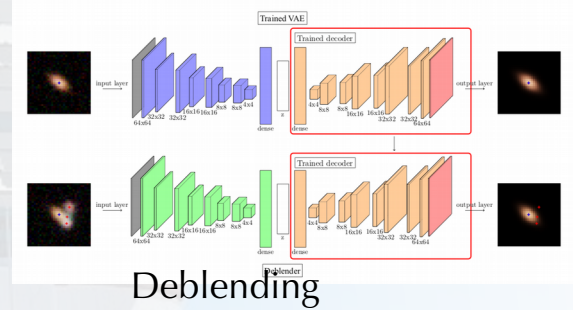

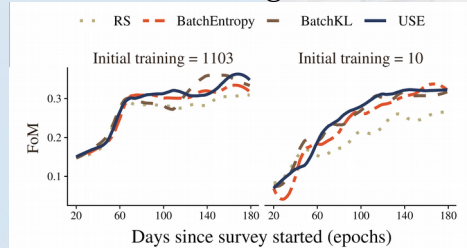

Sanchez, Kessler, Scolnic et al. 2021

# A wealth of French contributions

HSC DIA real/bogus

Active learning...

Cluster Mass Modeling

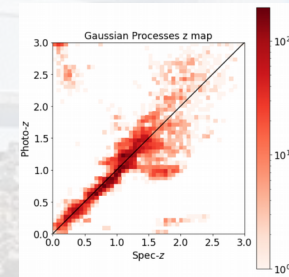

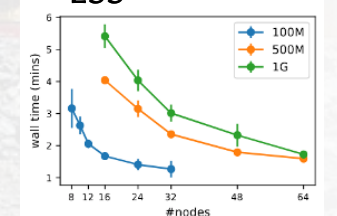

Photo-z

LSS

Anomalies

PSF centroids

22/11/21

Emmanuel Gangler – Rubin-LSST France in nebulae

# The path forward

- **Commissioning** and **computing** are the obvious next steps
  - IN2P3 success of call on commissioning
    - Pending Rubin Obs' feedback
    - I would like to see more **internal organization for pixel-level commissioning**
  - DP0.2 computing will be demanding
- **Preparing for science should be on radar**
  - Very good involvement within DESC... (Bravo Clusters ! But not only...)
  - Some points requiring attention:
    - French **supernova effort** erosion in DESC. → Effort needed to be leaders on this science.
    - Promoting **technical work** at DESC-wide level (PSF, calibration...) → this can be done within Project
    - Use of FINK **for DESC** (current lack of FTEs)
    - Use of CC resources for DESC analysis ?
- **Exciting times for students: starting PhDs will see first LSST data !**

# Acronyms

- AGN: Active Galaxy Nuclei
- CCOB: Camera Calibration Optical Bench
- ComCam: Commissioning Camera
- DESC: Dark Energy Science Collaboration
- DC2: DESC Data Challenge 2
- DP0,DP1,DP2 : Data Preview 0,1,2
- EPO: Education and Public Outreach
- FTE: Full Time Equivalent
- FINK: The French broker (not an acronym)
- LSS: Large Scale Structures
- LSST: Rubin Observatory Legacy Survey of Space and Time
- LSSTCam: LSST Camera
- LSST – SC: LSST Science collaboration
- MoA: Memorandum of Agreement
- MW: Milky Way
- PCW: Project and Community workshop
- PI: Principal Investigator
- RSP: Rubin Science Platform
- SCOC: Survey Cadence Optimizing Committee
- SSP: Subaru Supernova Project
- ZTF: Zwicky Transient Facility
