

GDR-InF annual workshop

mercredi 17 novembre 2021

Session IV: heavy flavor production, spectroscopy and gamma measurements - Amphitheatre Charpak (10:40 - 12:40)

-Présidents de session: Emi KOU; Benjamin Audurier

time	[id] title	presenter
10:40	[102] Study of charmonium production via ppbar decay at the LHCb experiment	ZHOVKOVSKA, Valeriia
11:00	[104] Lambda_c polarization measurements	NIEL, Elisabeth
11:20	[101] η and η' physics at LHCb and recent work on measuring the η - η' mixing	DOWNES, Anthony
11:40	[113] Lambda cross section measurements	CALEFICE, Lukas
12:00	[105] Gamma studies	POLUEKTOV, Anton
12:20	[103] Measurement of the CKM angle γ with $B^0 \rightarrow D K^+ \pi^-$, $D \rightarrow K^0 S \pi^+ \pi^-$ double Dalitz plot analysis	SHIMIZU, Yuya
