

HealthGrid conference 2010

Monday 28 June 2010 - Friday 02 July 2010

University Paris XI - Laboratoire de l'Accélérateur Linéaire

Livret des résumés

Contents

Title to be confirmed	1
Title to be confirmed	1
Title to be confirmed	1
Putting a Heart into a Box: GPGPU simulation of a Cardiac Model on the XBox 360	1
Short contributions	1
Unconference	1
Oral contributions selected through call for papers	2
Grid-based International Network for Flu Observation (g-INFO)	2
Grid based Evaluation of a Liver Segmentation Method for Contrast Enhanced Abdominal MRI	2
Visualization, Analysis, and Design of COMBO-FISH Probes in the Grid-Based GLOBE 3D Genome Platform	2
Grid Heterogeneity in In-silico Experiments: An Exploration of Drug Screening Using DOCK on Cloud Environments	2
CHOIS: Enabling grid technologies for obesity surveillance and control	2
Mean-Shift scale parameters optimization on the EGEE grid	2
Web service catalogue for Biomedical GRID infrastructure	2
Phylogenetic Code in the Cloud – Can it Meet the Expectations?	3
Integrating TRENCADIS Components in gLite to Share DICOM Medical Images and Structured Reports	3
Research Traceability using Provenance Services for Biomedical Analysis	3
Grid-wide neuroimaging data federation in the context of the NeuroLOG project	3
Sentinel e-health network on grid: developments and challenges	3
Oral contribution n°13	3
Oral contribution n°14	3

A Survey of Grid Knowledge and Grid Perception in Public Administrations	3
Programming distributed medical applications with XWCH2	4
Privacy aware access controls for medical data disclosure on European HealthGrids . . .	4
On Transferring the Grid Technology to the Biomedical Community	4
Décryphon Grid - Grid Resources Dedicated to Neuromuscular Disorders	4
Hitting the Ground Running: Healthgrid deployment and adoption	4
Using Graphics Processors to Accelerate Protein Docking Calculations	4
CAPS sponsor talk	4
Workshop: outGRID project Workshop	4
Presentation of the OutGrid project	4
Introduction, goal of the workshop	5
Finnish NGI / Nordic use community	5
NHRF, Greece	5
NHRF, Greece	5
Swiss Grid community (Swiss National Grid Association (SwiNG), and Swiss Institute of Bioinformatics)	5
German user group(s) (TBC)	5
German user group(s) (TBC)	5
German user group(s) (TBC)	5
German user group(s) (TBC)	6
Dutch user community and NGI	6
Dutch user community and NGI	6
French user community	6
Spanish user community	6
FKPPL and Rhône-Alpes Virtual Organizations	6
LIBI Italian project	6
eNMR EU project	6
BILS_Sweden	6
Discussion	7
Italian Life-Sciences initiative	7

Title to be confirmed

Brilliant medical doctor and scientist, Professor Jean Claude Healy has contributed to the transformation of healthcare at the European level when he was leading the DG-INFSO unit “Telematic Applications for Health” at the European Commission. Jean-Claude was a devoted supporter of e-Health and also a great visionary who really got involved into the development of the HealthGrid initiative. In memoriam of Jean Claude Healy, who passed away in 2008, we have decided to give his name to the keynote speech about the prospective vision of healthgrids evolution, given yearly by a distinguished scientist invited to the HealthGrid conference. This year, we are honored to welcome Dr. Joan Helen Dzenowagis, WHO, to present the “Jean Claude Healy keynote speech”.

Accessibility and socio-economic aspects / 2

Future of grids / 4

Putting a Heart into a Box: GPGPU simulation of a Cardiac Model on the XBox 360

When they first hit the market the current “next” generation of games consoles are, pretty much by definition, the most powerful “bangs per buck” computing hardware one can get, especially in terms of their graphical computing power and advanced GPUs. However, little work has been published which actually uses this power to produce useful research results. One exception is my recent paper using the XBox 360 to carry out electro-cardio dynamics simulations, recently published in the Computational Biology and Chemistry*. This I shall discuss in the broader context of using games consoles as an alternative HPC resource.

I shall also discuss the wider publicity generated by this paper, and highlight how games could be a very powerful tool in the Public Engagement with Science arena.

- Implications of the Turing Completeness of Reaction-Diffusion Models, informed by GPGPU simulations on an XBox 360: Cardiac Arrhythmias, Re-entry and the Halting Problem, S.Scarle, Computational Biology and Chemistry 33 253 (2009)

5

Short contributions

6

Unconference

Applications / 7

Oral contributions selected through call for papers

Applications / 8

Grid-based International Network for Flu Observation (g-INFO)

Applications / 9

Grid based Evaluation of a Liver Segmentation Method for Contrast Enhanced Abdominal MRI

Auteur(s) contact: dagmar.krefting@charite.de

Applications / 10

Visualization, Analysis, and Design of COMBO-FISH Probes in the Grid-Based GLOBE 3D Genome Platform

Auteur(s) contact: nick.kepper@bioquant.uni-heidelberg.de

Applications / 11

Grid Heterogeneity in In-silico Experiments: An Exploration of Drug Screening Using DOCK on Cloud Environments

Auteur(s) contact: wenwaiyim@gmail.com

Applications / 12

CHOIS: Enabling grid technologies for obesity surveillance and control

Applications / 13

Mean-Shift scale parameters optimization on the EGEE grid

Auteur(s) contact: ting.li@creatis.insa-lyon.fr

Core technologies and data integration / 14

Web service catalogue for Biomedical GRID infrastructure

Auteur(s) contact: maxgarcia@uma.es

Core technologies and data integration / 15

Phylogenetic Code in the Cloud – Can it Meet the Expectations?

Core technologies and data integration / 16

Integrating TRENCADIS Components in gLite to Share DICOM Medical Images and Structured Reports

Auteur(s) contact: iblanque@dsic.upv.es

Core technologies and data integration / 17

Research Traceability using Provenance Services for Biomedical Analysis

Auteur(s) contact: peter.bloodsworth@cern.ch

Core technologies and data integration / 18

Grid-wide neuroimaging data federation in the context of the NeuroLOG project

Auteur(s) contact: alban.gaignard@i3s.unice.fr

Core technologies and data integration / 19

Sentinel e-health network on grid: developments and challenges

Core technologies and data integration / 20

Oral contribution n°13

Core technologies and data integration / 21

Oral contribution n°14
