HealthGrid conference 2010

June 28, 2010 to July 2, 2010

University Paris XI - Laboratoire de l'Accélérateur Linéaire

Scientific Program

Every year, this conference is the opportunity to discuss the state of the art for the integration of grid practices into the fields of biology, medicine and health. This year, it will take place just at the time the European Grid Initiative will start federating the national grid initiatives and propose its resources to the Research Infrastructures. This year, the conference will be the opportunity to discuss the impact of emerging architectures like cloud computing or new processors like General Purpose GPU. The conference program will include a number of high profile keynote presentations complemented by a set of refereed papers selected through a call for papers.
