## CONCORDIA-ESAP update

G Hughes

# Update

- Still no bright idea regarding authentication
  - DIRAC using tokens would be great ....
- DIRAC ESAP branch is deprecated, will be deleted
  - <https://git.astron.nl/astron-sdc/esap-api-gateway/-/tree/69> add diracIAM
- New issue and branch
  - Able to submit and query helloworld example
  - <https://git.astron.nl/astron-sdc/escape-wp5/esap-general/-/issues/95>
  - <https://git.astron.nl/astron-sdc/esap-api-gateway/-/tree/99> CONCORDIA framework
  - Plan is to merge this branch this week and then hide the archive until we make more progress  
This will prevent deprecation seen in branch 69 (above)
- ESAP News:
  - Organizing a meeting regarding batch computing, will add you to the list
  - Discussions ongoing regarding executing software
    - <https://git.astron.nl/groups/astron-sdc/escape-wp5/-/wikis/ESAP/Container-metadata>
