

Onboarding procedure

Status and Overview

1. describe

2. enrich

3. publish

Current issues

- Entry point to procedure - hard to find?
 - Instead of checklist put "How to onboard" on OSSR pages?
 - Template issues will be updated to point to expanded version of checklist
- Verification processes
 - Codemeta as SSOT for documentation and verification?
 - Codemeta verifier to include checks for onboarding? (License, doc link?)
 - Organization of curation process?

Upcoming onboarding

- Need to clarify roles (Onboarding manager, contributors to verification)?
- Need for further developments in the procedure?
- Need to address contributors?
