

Innovation Cell

Stéphan BEURTHEY & Marc FERRARI

Fields of innovation

Technological developments and transfers linked to IPhU activities

➤ Support IPhU members on:

- Innovations : how to identify it, valorize it, etc..
- Links with other valorization entities : SATT, CNRS Innov, etc..
- Transfer & Industrial interactions
- Valorization of technological platforms

IPhU Graduate School and Outreach

➤ Support for innovative ways of teaching, training and communicating

- We need a few motivated persons to join the cell to foster and coordinate the emergence and implementation of concrete actions on these aspects
- If you are interested, please contact us!

What we have done in 2021

- Identify our capabilities, skills and know how
 - Discussion and exchange with CISAM
 - Description of our Technological Platform and expertise
 - Integration in AMU/CISAM Portfolio
- Dedicated to external communication

- Construction of a web page on the IPhU site :
 - <https://www.univ-amu.fr/fr/public/cellule-innovatio>

- Production of a flyer for internal communication

CITÉ DE L'INNOVATION
ET DES SAVOIRS
AIX-MARSEILLE

What is planned

- **Internal communication** on innovation cell
 - Realization of a communication pack
 - Presentation of Innovation cell during general lab meetings (x2 per year?)
 - “What can we do for you” and flyer distribution
 - Continue **discussion with CISAM** and AMU
 - How to integrate the IPhU Innovation Cell actions in the CISAM+ project ?
- Organization of an **“R&D Institute event”** in the framework of the AMU/CISAM call:
 - 3-5 days in November
 - Exchanges between IPhU lab personnel & students, and industry on R&D and Innovation
 - Participation of 3-5 invited companies among our main partners
 - Employment/internships exchange with these companies
 - AKATON on companies R&D challenges – students + teachers (to be confirmed)

To conclude

Innovation Cell is still unknown among the IPhU labs,
=> Communication actions planned

In 2021 we could not find any project to support ...
but we were not really looking for one either...
(COVID/lack of availability)

We have a big challenge in 2022 with the organization of
the Institute R&D event (if our project is selected)

**We need you and your innovations,
on both technological and knowledge transfer fronts!**
