

# Final WP2/DIOS deliverable M40 (May 2022)

*D2.3: “Final assessment and analysis of the full prototype, outlook for further development and deployment towards full production services within EOSC”*

- Content:
  - DAC21 digested analysis:
    - RI representative(s): how DIOS responded to experiment workloads
    - Every Task Leader: what DIOS provided, how it evolved and how responded to the experiment workloads
  - Outlook towards consolidated services in EOSC
  - Established relationships and outlook towards joint initiatives
- Goal: moderate the length, maximise the impact
- Intention to kick-off the writing process next week
- Considering setting up and *Editorial* team, opinions?
