# Thank you!

- Valuable material, valuable feedback. Instrumental to capture the work done in the project and a reference record to model future activities
- Frank, focused and constructive discussions. Clear desire to continue talking to each other
- Passing a strong message as a community. Steady representation during the three days from the main players in DIOS: RIs, service and software leads and partner sites
- Special thanks to the scientific assistance team, session conveners and the zoom wizard
  - Alba, Agustin, Aleem, Elena, Debra, Rosie, Fabio, Mieke, Nadine, Debra
- Thanks to all speakers
- And to **EVERYONE** of you for making ESCAPE DIOS so cool. Your enthusiasm and engagement have been the key for this success, and consolidated ESCAPE as a reference project in the European Open Science and Scientific Computing scenario. Chapeau!

# ...but

- We are not done yet
- A new phase starts, under a different perspective, but crucial to focus and consolidate interests as discussed today
- Need to perhaps re-think periodicity of WP2 meetings
- But first... let's nail the final deliverable.
- ...hoping we can meet in person before the summer!

# Thanks!
