

WP6 MILESTONES & DELIVERABLES

Andrea Donini, IFT (UAM/CSIC) & IFIC (UV/CSIC)

ONCOMING MILESTONES

Unified treatment of systematics (end of 2009!)

discussed at this meeting; how to permit to GLOBES
to accept files with errors?

ONCOMING MILESTONES

Unified treatment of systematics (end of 2009!)

discussed at this meeting; how to permit to GLOBES
to accept files with errors?

Scenarios for Li and B beta-beams (feb 2010!)

some work done for $\gamma = 100$, hope to have educated guess on
fluxes with higher γ at some point (this year?)

ONCOMING MILESTONES

Unified treatment of systematics (end of 2009!)

discussed at this meeting; how to permit to GLOBES
to accept files with errors?

Scenarios for Li and B beta-beams (feb 2010!)

some work done for $\gamma = 100$, hope to have educated guess on
fluxes with higher γ at some point (this year?)

Comparison of facilities with updated fluxes (all the time)

latest comparison in the WWP6 2009 Yearly Report, arXiv:1005.3146

ONCOMING MILESTONES

Unified treatment of systematics (end of 2009!)

discussed at this meeting; how to permit to GLOBES
to accept files with errors?

Scenarios for Li and B beta-beams (feb 2010!)

some work done for $\gamma = 100$, hope to have educated guess on
fluxes with higher γ at some point (this year?)

Comparison of facilities with updated fluxes (all the time)

latest comparison in the WWP6 2009 Yearly Report, arXiv:1005.3146

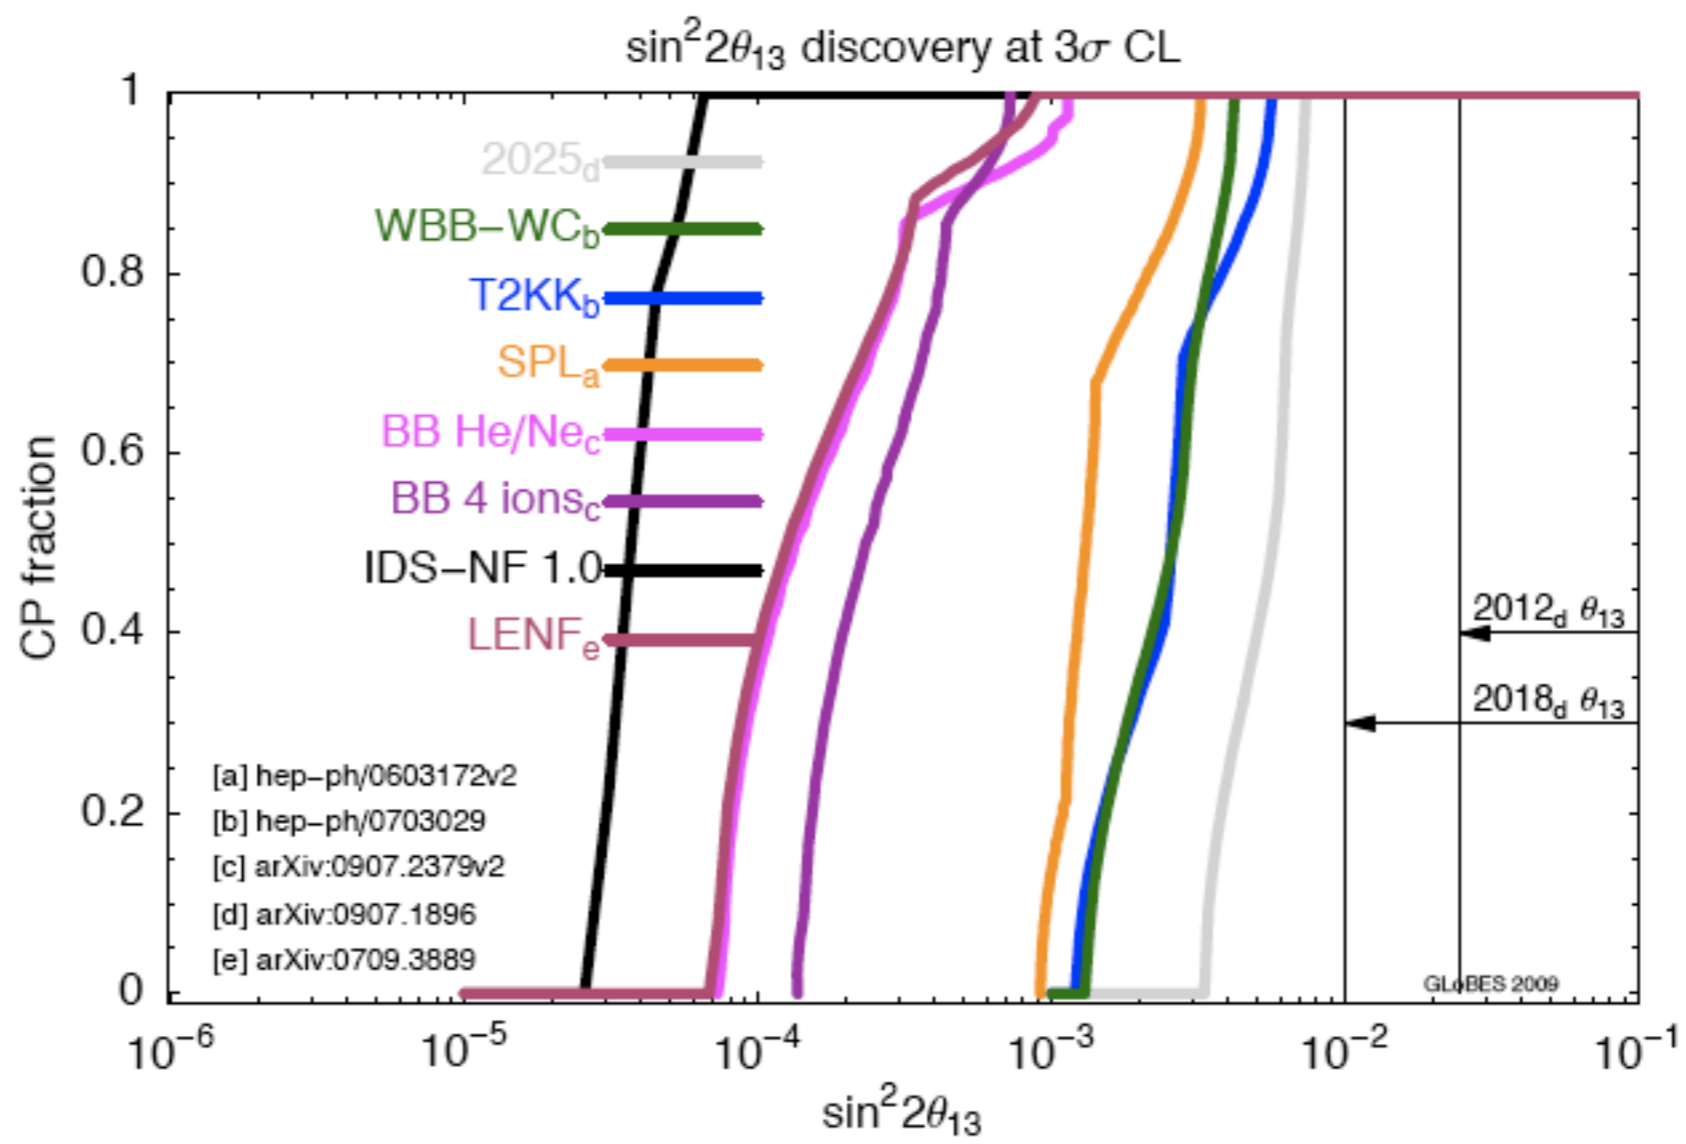

Impact of flavour physics measurements (end of 2010)

DELIVERABLES

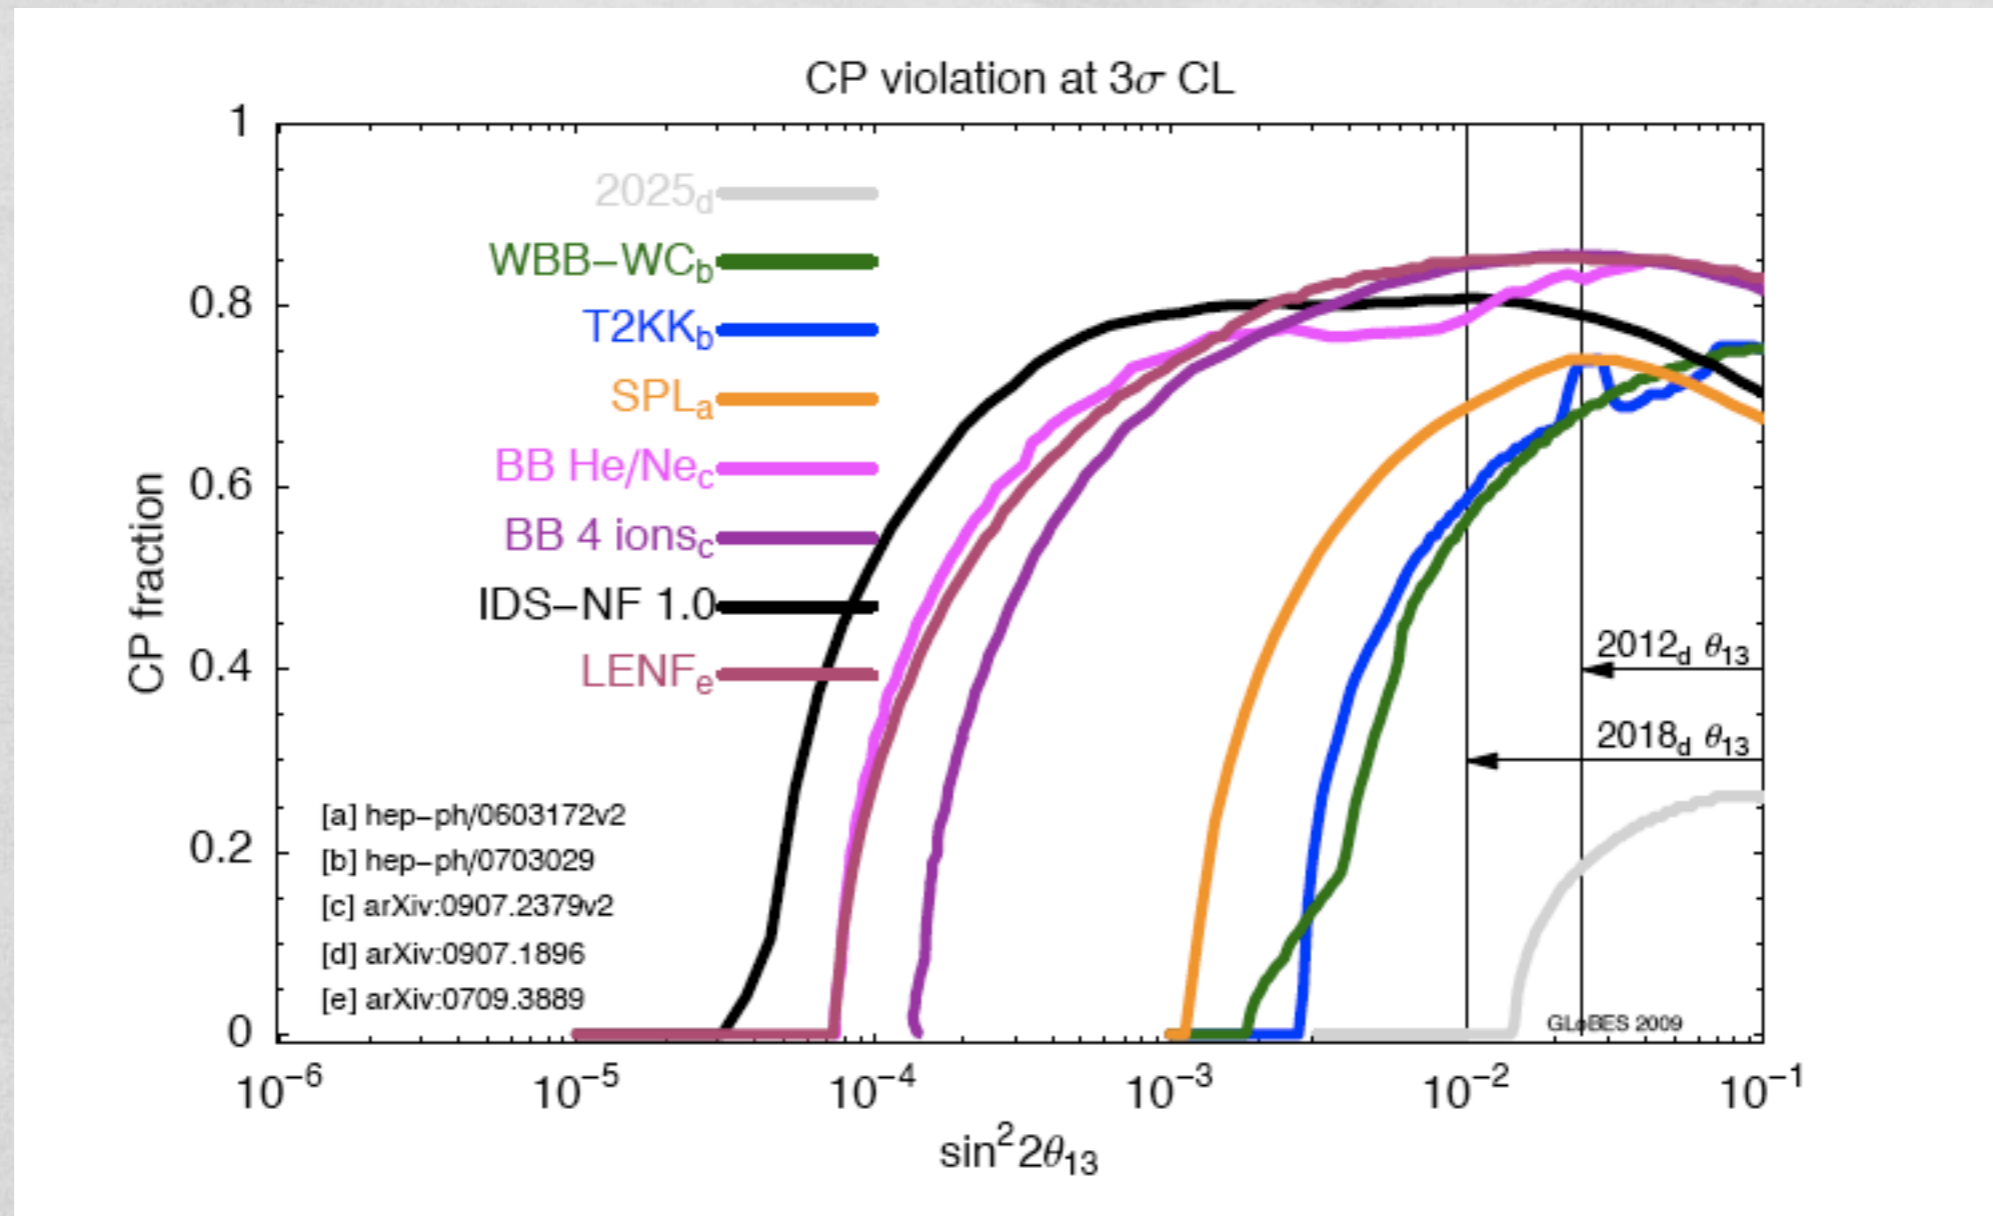

Comparison of facilities with updated fluxes (all the time)

latest comparison in the WWP6 2009 Yearly Report, arXiv:1005.3146

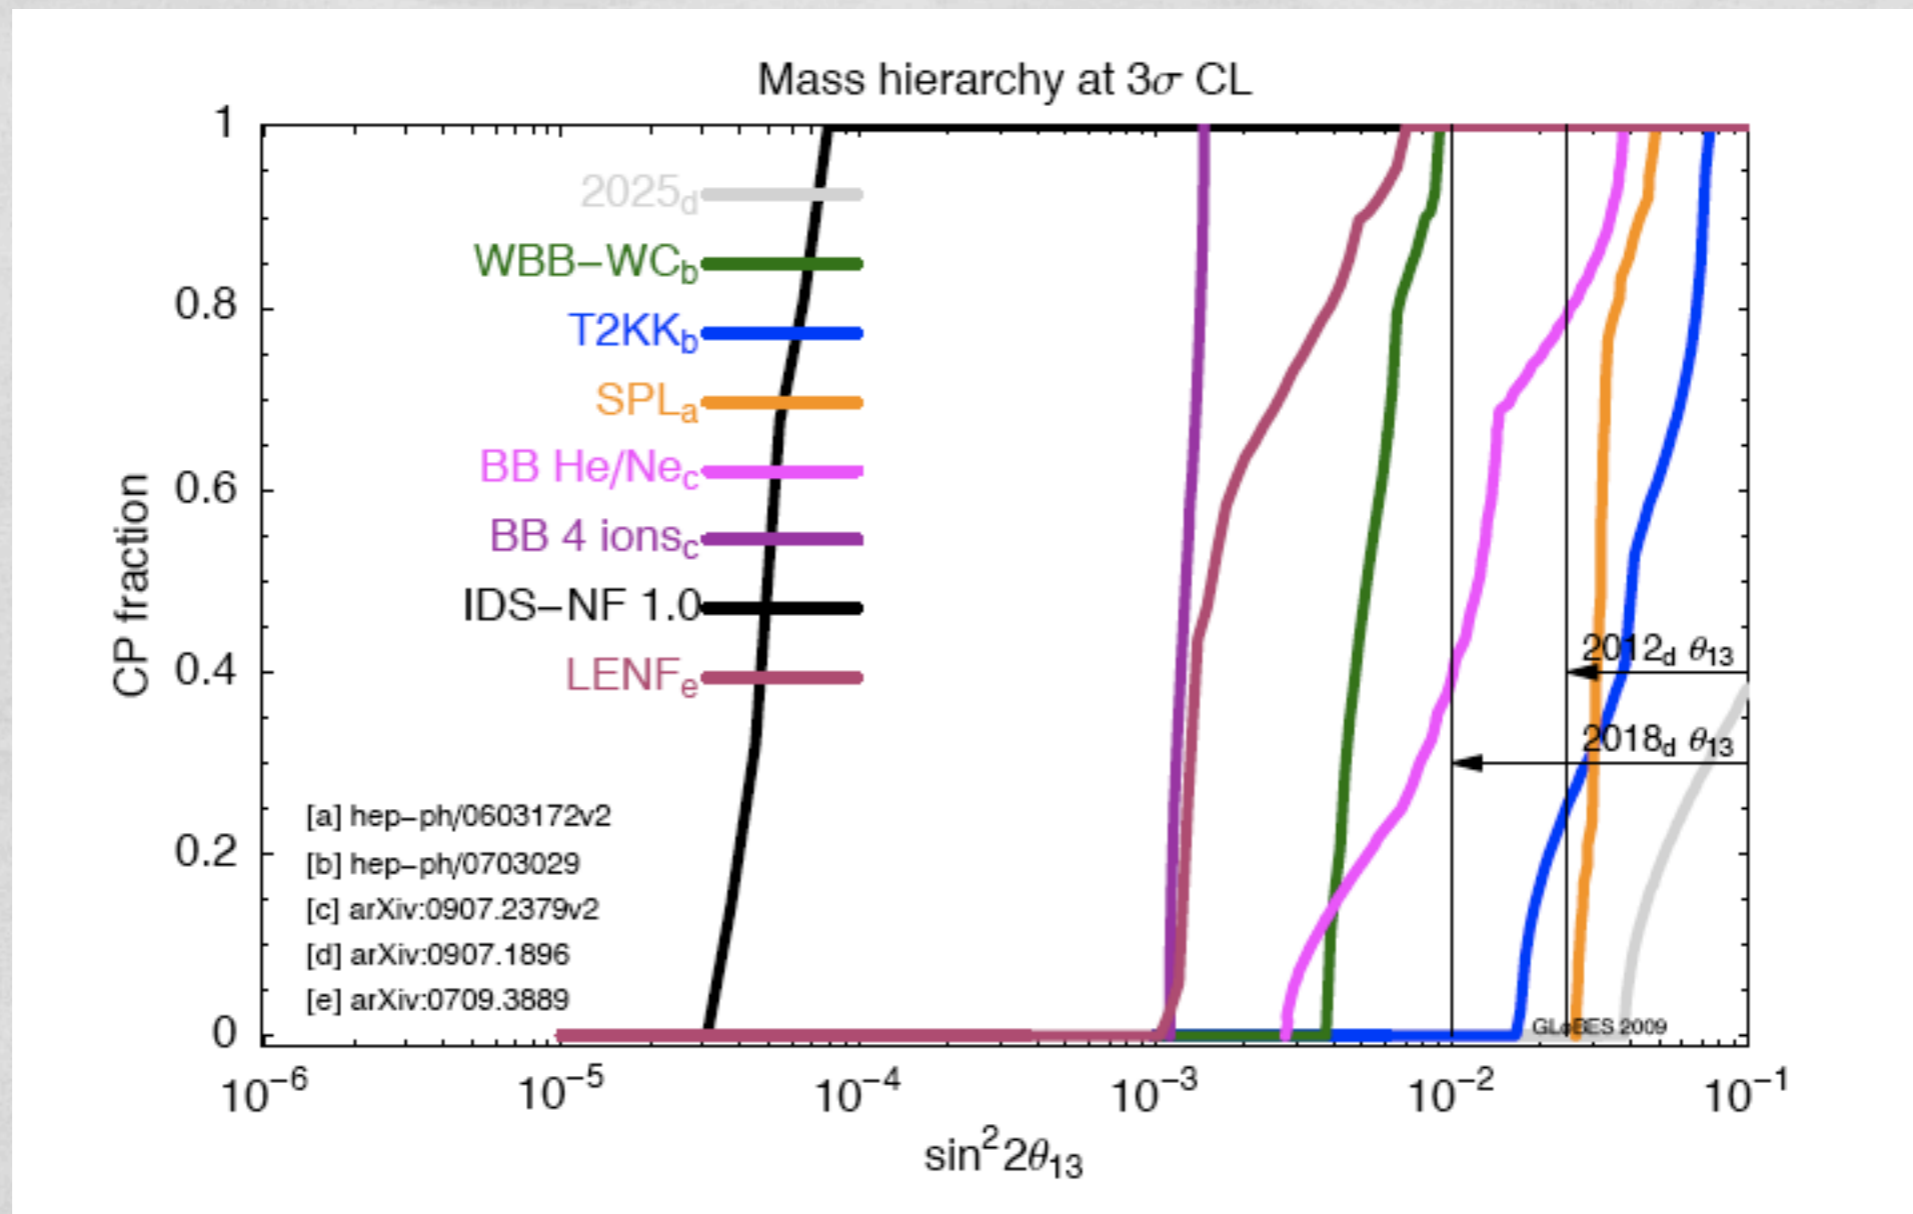

MIXING ANGLE

CP VIOLATING PHASE

MASS HIERARCHY

DELIVERABLES

Comparison of facilities with updated fluxes (all the time)

latest comparison in the WP6 2009 Yearly Report, arXiv:1005.3146

WP6 members have contributed to the EUROnu production rate with $O(20)$ documents so far!
