

GitLab : Intégration Continue

► Les pipelines

► Le status des pipelines :

This screenshot shows the 'Pipelines' section of the GitLab CI/CD interface. On the left is a sidebar with navigation links: CI/CD, Pipelines, Editor, Jobs, and Schedules. The main area displays two pipeline runs. The first run, #178989, is in a 'passed' state (green checkmark) and is the 'latest' detached build. It shows a commit hash of 9b0366a3 and a description 'Update isort section in p...'. The second run, #178982, is in a 'failed' state (red X) and is also a detached build. It shows a commit hash of b943afe6 and a description 'Improve coding style and...'. Each run includes a circular progress indicator.

► Le status des jobs :

This screenshot shows the 'Jobs' section of the GitLab CI/CD interface. The sidebar on the left is identical to the previous screenshot, with 'Jobs' highlighted. The main area displays three individual job runs, all of which are in a 'passed' state (green checkmark). Each job entry includes a job ID, a commit hash (9b0366a3), a build number (#178989), and the job name. The jobs are: 'flake8', 'black', and 'isort', all under the 'linting' stage. Each job entry also features a circular progress indicator.
