

# PCIe400 Statut :

**Software**

# Hiérarchie de couches software

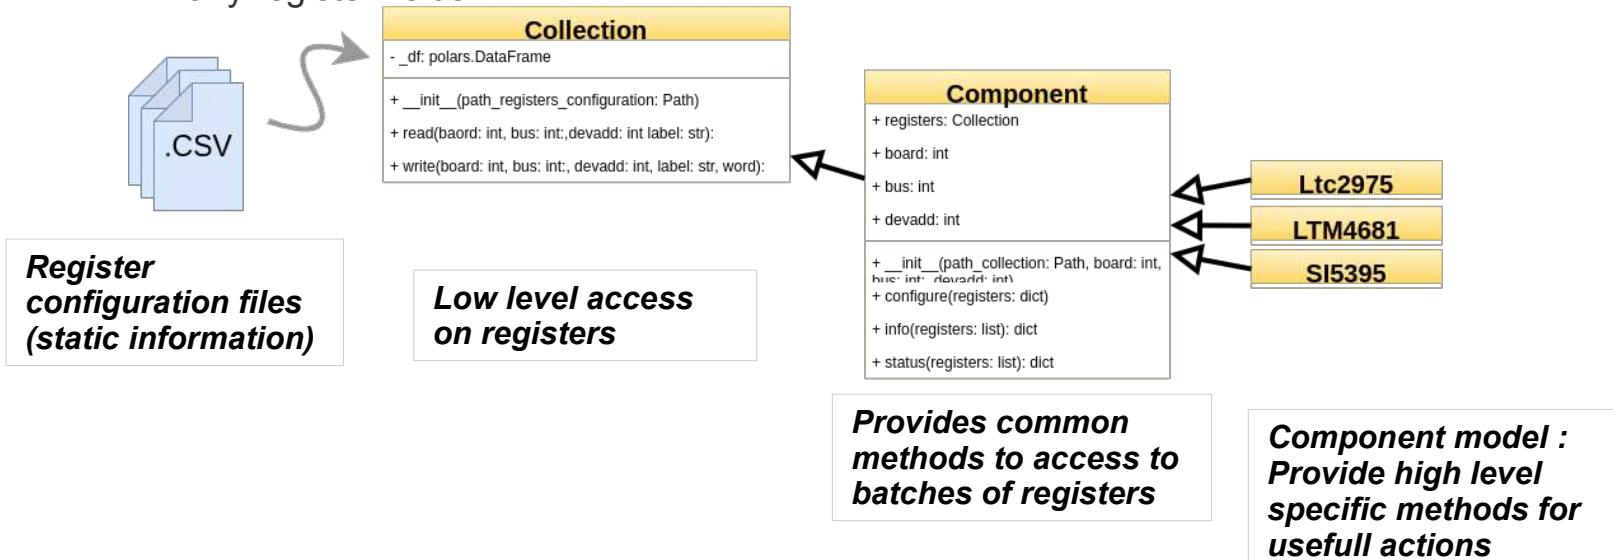

# Software

## Peripheral components

- Each component can be described by a list of registers with limited number of fields

## Implementation

- Take advantage of Dataframes and its manipulation methods in order to efficiently access any register fields.

# Tâches de développement

## 3 tâches majeures :

- Description/Modelisation des composants (p400-model, tests unitaires)
- Mise en place bus d'accès PCIe / JTAG sur devkit Agilex
  - ▶ Sujet de la réunion du 29 juin
- Elaboration du plan de test fonctionnel de la carte prototype PCIe400
