

# Introduction

---

**Romain Madar** - LPC

**FCCEe Meeting**

March 16th, 2022

## Organization

- w/ phys & perf convener and sw convener
- meeting every 3rd monday of each month
- we're welcome to present there (working meetings)

## Official tools and samples

- access granted to official samples (playing with the event model)
- any stdhep file can be converted into an 'official sample'

# Overview of on-going efforts

## Sensitivity of observable to operators

- 1st step: using MadGraph, truth level only → done (DPG)
- 2nd step: using Whizard, truth & reco level → on-going (cf. below)

## PDF sampling

- alternative method ready to be tested on the full LH from [epjc paper](#)

## Running Whizard: report today by Laetitia

- taking the tool in hands → being done
- testing with UFO models → next step

## Reco-level: first look at official FCCee samples
