

IN2P3-COPIN Workshop

lundi 7 novembre 2022 - mardi 8 novembre 2022

Strasbourg

Programme Scientifique

The goal of the workshop is to contribute to the visibility of the IN2P3-COPIN collaborations, intensify the scientific discussion and encourage the development of new projects.

The workshop is opened to the wider community, in addition to the existing projects. Two days of talks and time allocated for parallel smaller meetings among the participants are foreseen. The leaders (or any representative) of all existing and proposed new projects will present their research, recent achievements and future plans. Interaction within existing collaborations, and with the community, will be promoted to make emerging new collaborations. Presentation of the projects will be essential for their evaluation by the IN2P3-COPIN Mixed Committee.
