

# IN2P3 School of Statistics

Yann Coadou  
*for the SOS organising committee*

CPPM Marseille

IN2P3/IRFU Machine Learning workshop  
APC, 27 September 2022

## ■ Origin:

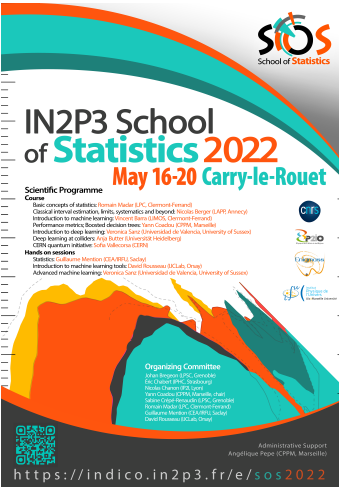

- strong demand from IN2P3 community for statistical analysis training
- usually not much developed during initial training
- nowadays key ingredient of scientific results production

## ■ Goal: *describe, explain and manipulate statistical concepts and tools necessary to perform statistical analysis of data in particle physics, astroparticle physics and cosmology*

- proper usage of tools
- real impact in day-to-day work
- competitiveness and visibility in our big collaborations

## ■ Evolution: Over the years, increased part related to machine learning and hands-on sessions

## ■ Target audience: PhD students, postdocs, staff (junior and senior) interested in basic concepts and new tools

**IN2P3 School of Statistics 2022**  
May 16-20 Carry-le-Rouet

**Scientific Programme**  
**Course**  
Basic concepts of statistics: *François Moutou, J.P.C., Clément Fournel*  
Classical inferential methods, tests, systematic and beyond: *Nicolas Berger (LAPP) Anneloc*  
Introduction to machine learning: *Vincent Barot (UMR5), Clément Fournel*  
Performance metrics: Bayesian decision theory: *Yann Coadou (CPPM, Marseille)*  
Introduction to deep learning: *Veronica Sanz (Universidad de Valencia, University of Sussex)*  
Deep learning at colliders: *Frédéric Buisson (Université de Strasbourg)*  
CPML quantum inference: *Sacha Takahara (CEP)*

**Hands on sessions**  
Statistics: Guillaume Monette (CEA-IRFU, Saclay)  
Introduction to machine learning tools: David Rousseau (CC-Lab, Orsay)  
Advanced machine learning: *Veronica Sanz (Universidad de Valencia, University of Sussex)*

**Organizing Committee**  
Alexis Becquet (LAPP, Grenoble)  
Eni Chauvet (IRFU, Saclay)  
Nicolas Chauvet (IRFU, Saclay)  
Yann Coadou (CPPM, Marseille) (Chair)  
Sabine Chapel-Renaudin (LAPP, Grenoble)  
Francois Moutou (LAPP, Clément Fournel)  
Guillaume Monette (CEA-IRFU, Saclay)  
David Rousseau (CC-Lab, Orsay)

Administrative Support  
Anneloc Peppé (CPPM, Marseille)

<https://indico.in2p3.fr/e/sos2022>

- 8<sup>th</sup> edition of successful biennial series  
... after Strasbourg (2008), Autrans (2010–2016), La Londe-les-Maures (2018), Zoom (2021)
- Back to in-person mode
- 16–20 June 2022 in Carry-le-Rouet (13)
- Attendance: PhD students, postdocs, engineers
- In English (many foreign students in our labs)
- Indico: [▶ https://indico.in2p3.fr/e/SOS2022](https://indico.in2p3.fr/e/SOS2022)
- General web site: [▶ http://sos.in2p3.fr](http://sos.in2p3.fr)
- Financial support:

**SOS**  
School of Statistics

## IN2P3 School of Statistics 2022

May 16-20 Carry-le-Rouet

**Scientific Programme**

**Course**  
 Basic concepts of statistics: Romain Madar (LPC, Clermont-Ferrand)  
 Classical interval estimation, Anbs, asymptotics and beyond: Nicolas Berger (LAPF, Arancay)  
 Introduction to machine learning: Vincent Bana (LJNC, Clermont-Ferrand)  
 Performance metrics: Biased decisions trees: Yann Coadou (CPPM, Marseille)  
 Introduction to deep learning: Valencia Sans (Universidad de Valencia, University of Sussex)  
 Deep learning at colliders: Arjo Butler (Universidad Heidelberg)  
 CPPM quantum initiatives: Sofia Volkovska (CEPR)

**Hands on sessions**  
 Statistics: Guillaume Mention (CEA/IRFU, Saclay)  
 Introduction to machine learning tools: David Rousseau (IJCLab, Orsay)  
 Advanced machine learning: Valencia Sans (Universidad de Valencia, University of Sussex)

**Organizing Committee**  
 Jean Rousseau (LPC, Clermont-Ferrand)  
 Eric Chabert (IPHC, Strasbourg)  
 Nicolas Chanon (IP2I, Lyon)  
 Yann Coadou (CPPM, Marseille, chair)  
 Sabine Crépé-Renaudin (LPC, Clermont-Ferrand)  
 Romain Madar (LPC, Clermont-Ferrand)  
 Guillaume Mention (CEA/IRFU, Saclay)  
 David Rousseau (IJCLab, Orsay)

**Administrative Support**  
 Angélique Pèpe (CPPM, Marseille)

## Organising committee

- Johan Bregeon (LPSC, Grenoble)
- Éric Chabert (IPHC, Strasbourg)
- Nicolas Chanon (IP2I, Lyon)
- Yann Coadou (CPPM, Marseille) –chair–
- Sabine Crépé-Renaudin (LPSC, Grenoble)
- Romain Madar (LPC, Clermont-Ferrand)
- Guillaume Mention (CEA/IRFU, Saclay)
- David Rousseau (IJCLab, Orsay)

## Local support at CPPM

- Angélique Pèpe, Véronique Roux

## ■ Three main components:

- fundamental concepts (statistics, limits, systematics)
- machine learning: concepts, BDT, deep learning
- hands-on sessions (statistics, ML)

## ■ Time for discussion:

- good to be back in-person

	Mon 16	Tue 17	Wed 18	Thu 19	Fri 20
8:30-9:00					Hands-on: advanced machine learning
9:00-10:30	Arrival	Machine learning	Intervals & limits I	Intervals & limits II	
10:30-11:00		Break			
11:00-12:30		Boosted decision trees; Metrics	Hands-on: basics machine learning	Deep learning I	CERN quantum technology initiative
12:30-14:00	Lunch				
14:00-15:30	Basic concepts I	Hands-on: basic statistics	Free	Deep learning II	Departure
15:30-16:00	Break			Break	
16:00-17:30	Basic concepts II			Deep learning at colliders	

## Lectures

- **Romain Madar** (LPC, Clermont-Ferrand): Basic concepts
- **Vincent Barra** (LIMOS, Clermont-Ferrand): Machine learning
- **Yann Coadou** (CPPM, Marseille): Boosted decision trees; metrics
- **Nicolas Berger** (LAPP, Annecy): Intervals & limits
- **Veronica Sanz** (Universities of Valencia and Sussex): Deep learning
- **Anja Butter** (ITP Universität Heidelberg): Deep learning at colliders
- **Sofia Vallecorsa** (CERN): CERN quantum technology initiative

## Hands-on sessions

- **Guillaume Mention** (CEA/IRFU, Saclay): basics of statistics
- **David Rousseau** (IJClab, Orsay): Introduction to ML tools
- **Veronica Sanz** (Valencia and Sussex): advanced machine learning

- Complete overview of founding principles
- Metrics to evaluate ML algorithms in HEP
- Boosted decision trees
- Deep learning
  - basics of neural networks: empirical risk, gradient descent, backpropagation
  - DNN / CNN / RNN / LSTM
  - autoencoders
  - generative models
  - clustering algorithms
- Deep learning at colliders: top tagging, event generation, detector simulation, unfolding, uncertainty estimation
- CERN QTI: focus on quantum machine learning
- Hands-on

Advice: watch video recording of lectures

▶ <https://indico.in2p3.fr/e/SOS2022>

- All done with Jupyter notebooks, all available in indico
- Can run locally (install anaconda) or on Google Colab
- **Statistics**
  - basic python packages (NumPy, SciPy, Matplotlib)
  - probabilities
  - sampling
  - statistical inference
- **Introduction to machine learning**
  - dataset handling, features
  - BDT with XGBoost, LightGBM, scikit-learn GBDT
  - hyperparameter optimisation
  - figures of merit
  - variable selection (feature vs. permutation importance)
- **Advanced machine learning**
  - exploratory data analysis
  - deep networks
  - unsupervised learning with clustering: PCA, k-means, t-SNE, UMAP

- 46 participants (40 survey answers)
  - 39 PhD students (85%)
  - 2 postdocs (4%)
  - 5 engineers (11%)
- No Zoom link during school (but video recording)
  - favour in-person
  - not a showstopper for staff anymore?

## *You work in (check all relevant boxes)*

Answered: 40

- A. nuclear physics:** 4 (7.84%)
- B. theory:** 2 (3.92%)
- C. particle physics:** 27 (52.94%)
- D. astro / cosmo:** 8 (15.69%)
- E. neutrino:** 7 (13.73%)
- F. private company:** 0 (0.00%)
- G. other:** 3 (5.88%)

## *if you chose "other", please specify:*

Answered: 2

- DAQ Engineer
- Nuclear imaging

## How did you find the balance between basic concepts and advanced methods?

Answered: 40

**A. I would have preferred to spend more time on basics:** 12 (30.00%)

**B. I would have preferred to spend more time on advanced methods:** 11 (27.50%)

**C. The balance was good:** 17 (42.50%)

## How did you find the balance between lectures and hands-on sessions?

Answered: 40

**A. I would have preferred to spend more time on lectures:** 5 (12.50%)

**B. I would have preferred to spend more time on hands-on sessions:** 13 (32.50%)

**C. The balance was good:** 22 (55.00%)

- Right balance between topics
- Hard to have more hands-on, possibly some code examples within lectures (done in limits lecture)

- Brainstorming about ways to improve hands-on experience

- Most likely in May 2024:
  - in person
  - one week in a relatively isolated place to foster discussions
  - possibly in Carry again
- Interested in joining the organisation? Come and talk to me!

School of **Statistics**

```
[ ] import scipy.stats
scipy.stats.poisson
```
