MATTERMOST vs SLACK

- As of last week, the Mattermost instance hosted @IJCLab was updated to v7.1:
 - Solves some issues in display making the interface rather unfriendly to use
 - Basically equivalent to Slack now in terms of interface
 - Webhooks are usable and unrestricted in numbers
 - Mattermost allows for unlimited storage of all messages
 - Mattermost should be accessible without restriction to our chinese colleagues
- Join SVOM-Mattermost for those of you who haven't done so yet:
 - https://svack.lal.in2p3.fr/signup_user_complete/?id=xu7nyb6gkfrk8j6tsftthmog4a
 - Let's try to use Mattermost for a while before deciding whether or not to migrate there
 - **IF** we decide to migrate Mattermost, the Svom Slack will obviously remain open as a fallback in case something is wrong with the Mattermost server
