Instrumentation Technology Development at KEK

mardi 28 mars 2023 15:05 (25 minutes)

A new test beam line for detector development was built at KEK, and currently is under commissioning. A new group, Instrumentation Technology Development Center (ITDC), has been also formed under Institute for Particle and Nuclear Studies to drive the new test beam line, and to be an international hub for technology development. We present the overview and status of the test beam line and ITDC.
