

Dark energy and string theory: an update

mardi 7 novembre 2023 14:30 (20 minutes)

Trying to obtain dark energy from string theory models is a challenge. An important activity has taken place recently: attempts to obtain a positive cosmological constant (de Sitter spacetime) have mostly failed, and the community has turned to quintessence-like scenarios. Those derived from string theory remain so far difficult to accommodate with observations.

Auteur principal: Dr ANDRIOT, David (LAPTh, CNRS)

Orateur: Dr ANDRIOT, David (LAPTh, CNRS)

Classification de Session: Review and contribution talks
