Deuxième Plan national pour la science ouverte

GÉNÉRALISER LA SCIENCE OUVERTE EN FRANCE 2021-2024

Second National Plan for Open Science | 2021-2024

→ The roadmap for open science in France

→ Focus on **structuring the french research data support landscape**

→ Creation of the *Recherche Data Gouv* **ecosystem in july 2022**

→ Aim to provide **RDM support services** close to the researchers

https://www.ouvrirlascience.fr/second-national-plan-for-open-science/

Recherche Data Gouv
ambitions

➔ Getting the **CoreTrustSeal certification** for the repository

➔ Becoming a **research infrastructure** and part of the French Research Infrastructure Roadmap for 2026

➔ *Recherche Data Gouv* aims to become a **European Open Science Cloud (EOSC) service**, offering access to shared and open research data to support reuse.

The *Recherche Data Gouv* ecosystem

2 modules to deposit, publish and disseminate data:

➔ A **repository** to deposit and disseminate data

➔ A **registry** to search for data published in the repository itself or other external repositories (*under construction*)

A **multidisciplinary repository**

→ **Sovereign** publishing solution for sharing and opening up data based on Dataverse

→ For research communities **without their own recognised thematic repository**
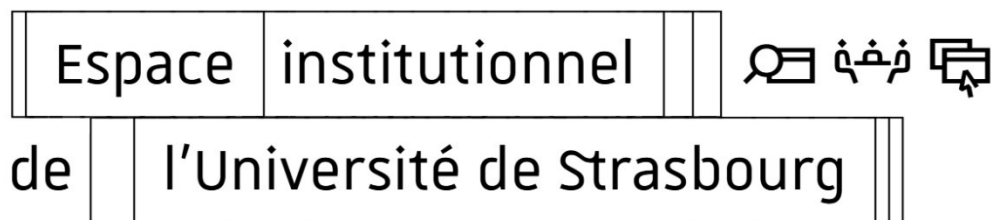

➡ **These data are not included in its perimeter:**

→ Data from health research activities involving **human beings** (Loi Jardé)

→ **Sensitive data** (industrial secret, endangering ecosystem, individuals...)

→ **Non-anonymised** or **pseudo-anonymised** personal data

A repository with **multiple collections**

→ A **generic space** for researchers without institutional space, and curated by the repository team

→ **Institutional spaces** curated by data curators from the institutions

The **Unistra collection**

# The *Recherche Data Gouv* ecosystem

4 modules to support research teams on all issues linked to data:

→ Thematic reference centres
→ Institutional reference centres
→ Resource centres
→ Data management clusters

The **Resource centres**

They provide support for the data management clusters and thematic reference centres.

Centre de ressources entrepôt-catalogue
Recherche Data Gouv

Centre de ressources supports pédagogiques, e-formations
Recherche Data Gouv

Centre de ressources compétences
Recherche Data Gouv

Centre de ressources outils communs aux ateliers
Recherche Data Gouv

https://recherche.data.gouv.fr/en/page/resource-centres

The **Thematic reference centres**

Thematic reference centres provide expertise for individual scientific fields

→ both national and disciplinary in scope

→ support data management and dissemination work in a scientific thematic area

→ **led by scientific communities** who structure the centers' work and mechanisms to provide support for data management, processing, sharing and opening in their given scientific field

→ define the **appropriate international data description standards**, best practices for data management, compile and manage a list of national and/or international reference data repositories in their thematic field,…

https://recherche.data.gouv.fr/en/page/thematic-reference-centers-providing-expertise-for-individual-scientific-fields

Université de Strasbourg

The **Thematic reference centres**

Astronomy and astrophysics

Biology-Health

Earth System et Environment
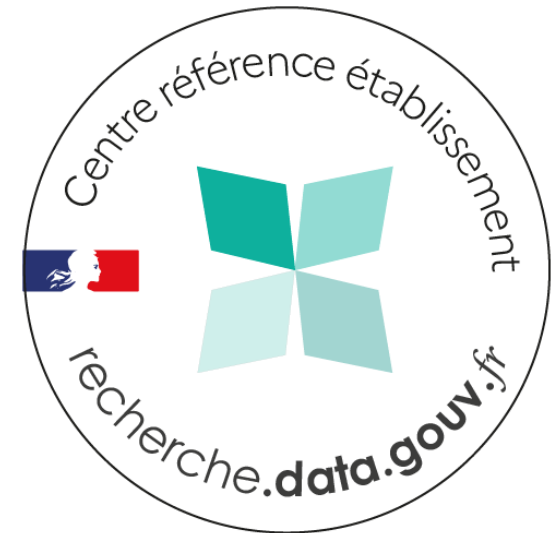

Humanities and Social Sciences

**Université** de Strasbourg

Institutional reference centres

National Higher Education and Research institutions that have been offering **support specific to their research orientations** and **intended for their research teams** for several years now complete the *Recherche Data Gouv* ecosystem.

https://recherche.data.gouv.fr/en/page/institutional-reference-centers

The **Data management clusters**

→ **One-stop-shops** providing researchers with **initial expertise** and advise them throughout the data life cycle

→ They are **geographically close** to research teams

→ They create a **national network** of data management clusters

Université de Strasbourg

The **Alsatian one-stop-shop**

ADELE Helpdesk

→ **5** research institutions

➡ **contact@adele.help**

The **Alsatian one-stop-shop**

ADELE Helpdesk

➔ With the support of **CNRS**, **Huma-Num** and **Progedo** IR*
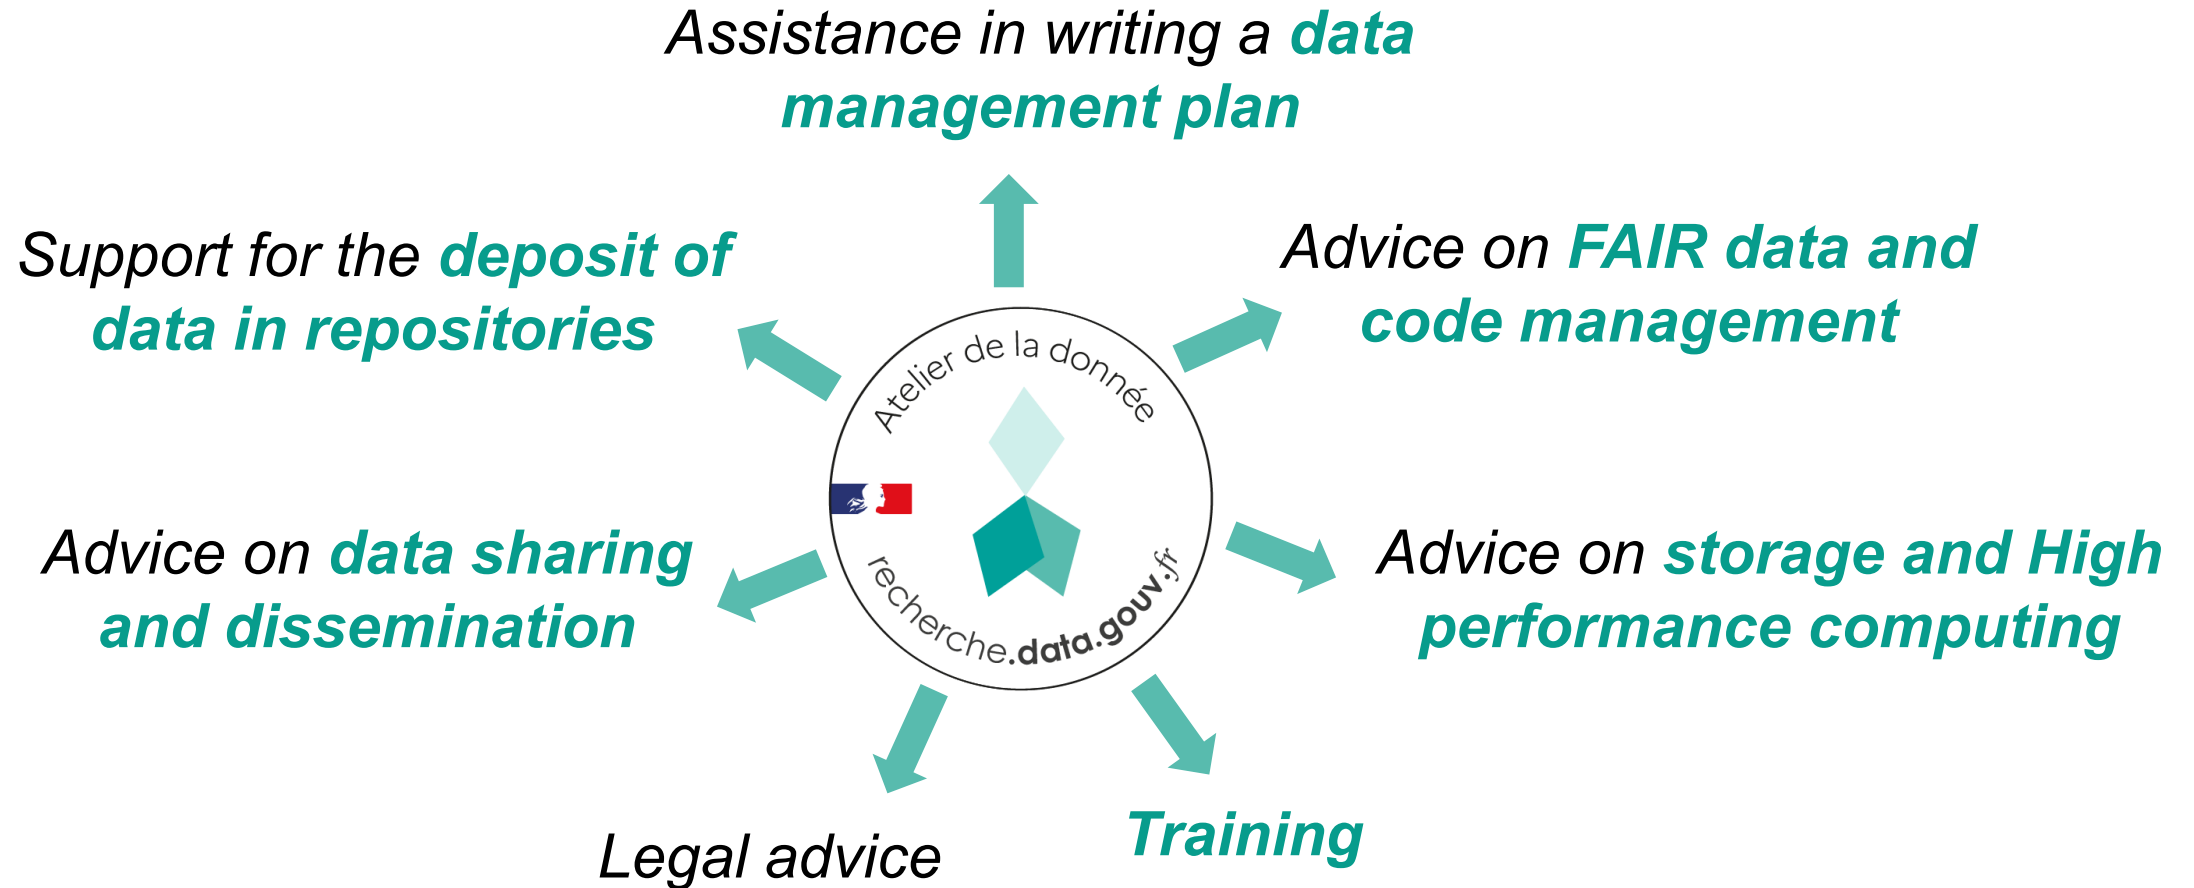

contact@adele.help

The **Alsatian one-stop-shop**

ADELE Helpdesk

→ **30** personnel (ca. 9 FTE)
→ **10** research support services including the **SCIGNE platform**

contact@adele.help

ADELE Helpdesk provides:

*Assistance in writing a **data management plan***

*Support for the **deposit of data in repositories***

*Advice on **FAIR data and code management***

*Advice on **data sharing and dissemination***

*Advice on **storage and High performance computing***
