Welcome/coffee

Welcome / **7**

Welcome/coffee

Welcome / **8**

Purpose of meeting

Auteur correspondant astrid.lamberts@oca.eu

Welcome / **9**

Context of L3 data production

Auteur correspondant antoine.petiteau@cea.fr

Lessons learned from other space missions / **10**

Gaia

Lessons learned from other space missions / **11**

Euclid

Auteur correspondant mvannier@oca.eu

Lessons learned from other space missions / **12**

XMM-Athena (TBC)

Auteur correspondant ogodet@irap.omp.eu

Lessons learned from other space missions / **13**

Fermi-GBM

The Global Fit / **14**

Global Fit@APC/L2IT

The Global Fit / **15**

Global Fit@Montana-MSFC

The Global Fit / **16**

A first catalog

Comparing Global Fits / **17**

Global fits with AI

Auteur correspondant korsakova@apc.in2p3.fr

Comparing Global Fits / **18**

comparing global fits

Auteur correspondant matt.edwards@auckland.ac.nz

The Global Fit / **19**

Analysis of LISA data challenges

The Global Fit / **20**

Tools to analyse LDC submissions

Auteur correspondant lejeune@apc.in2p3.fr

GW data use cases / **21**

Gravitational Wave Open Science Center (GWOSC)

Auteur correspondant jkanner@caltech.edu

GW data use cases / **22**

Building a catalogue: what can we learn from the LVK?

GW data use cases / **23**

Data for GW cosmology

Auteur correspondant nicola.tamanini@l2it.in2p3.fr

GW data use cases / **24**

Discussion

The Global Fit / **25**

Student presentations from LDC

GW data use cases / **26**

a LISA catalog of SMBH

GW data use cases / **27**

Lessons learned from the LVK

Lessons learned from other space missions / **28**

The Gaia Ground segment, practical matters

Lessons learned from other space missions / **29**

Lessons learned from Planck

GW data use cases / **30**

How the Ideal LISA Catalog of Galactic Binaries May Look Like: An Astronomer's Perspective

GW data use cases / **31**

LISA Verification binaries

GW data use cases / **32**

Final discussion and concluding remarks

Lessons learned from other space missions / **33**

XMM

GW data use cases / **34**

Gravitational wave open science center (GWOSC)

Auteur correspondant jkanner@caltech.edu

GW data use cases / **35**

Global Fit

Comparing Global Fits / **36**

Combining catalogs with Bayesian meta analysis

Comparing Global Fits / **37**

Global fits with AI

Auteur correspondant korsakova@apc.in2p3.fr

Comparing Global Fits / **38**

Analysis of LISA data challenges

Auteur correspondant quentin.baghi@cea.fr

Comparing Global Fits / **39**

Tools to analyse LDC submissions

Auteur correspondant lejeune@apc.in2p3.fr

Comparing Global Fits / **40**

Student presentations

Comparing Global Fits / **41**

Discussion on how to assess quality of a GF

GW data use cases / **42**

Astro WG

Auteur correspondant martav@iap.fr

GW data use cases / **43**

Cosmology

Auteur correspondant nicola.tamanini@l2it.in2p3.fr

Lessons learned from other space missions / **45**

Discussion

The Global Fit / **46**

A first LISA catalog

Comparing Global Fits / **47**

Analysis of the LISA Data Challenges

Auteur correspondant quentin.baghi@cea.fr

GW data use cases / **48**

Lessons learned from the LVK

GW data use cases / **49**

EMRIs

Auteur correspondant ollie.burke@l2it.in2p3.fr
