

What neutrinos may be able to give us in the next 10 years

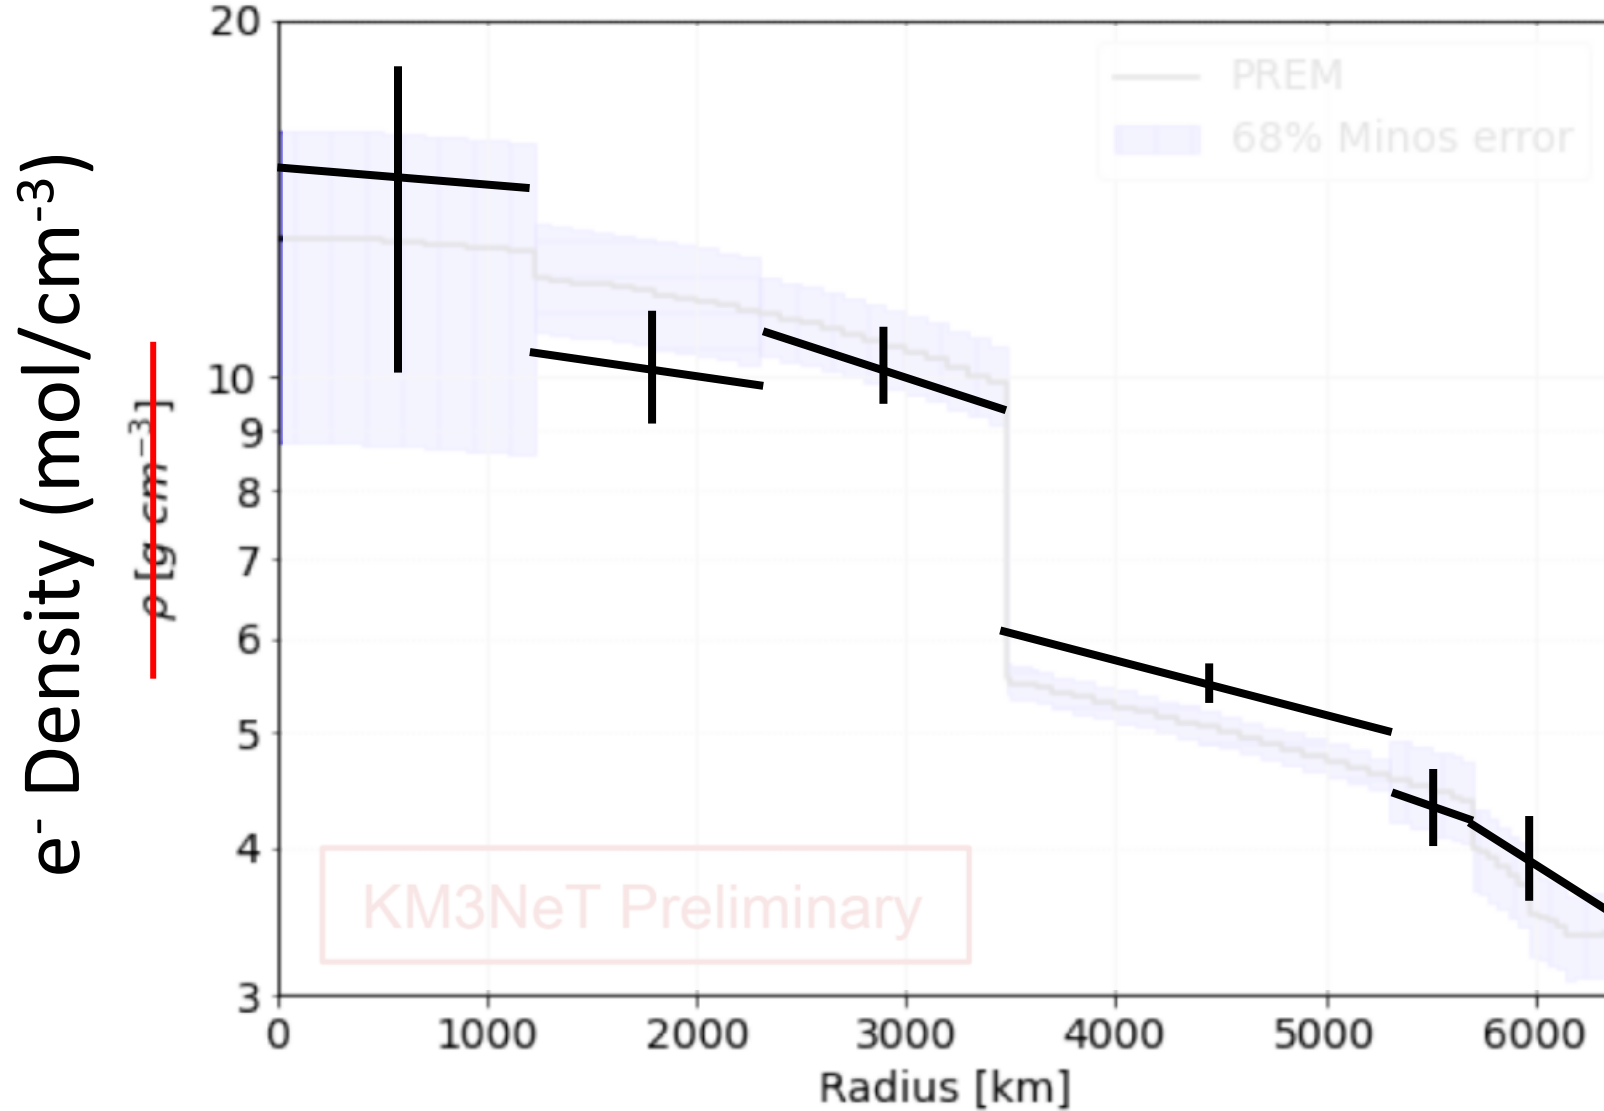

See Veronique Van Elewyck's talk later today for details

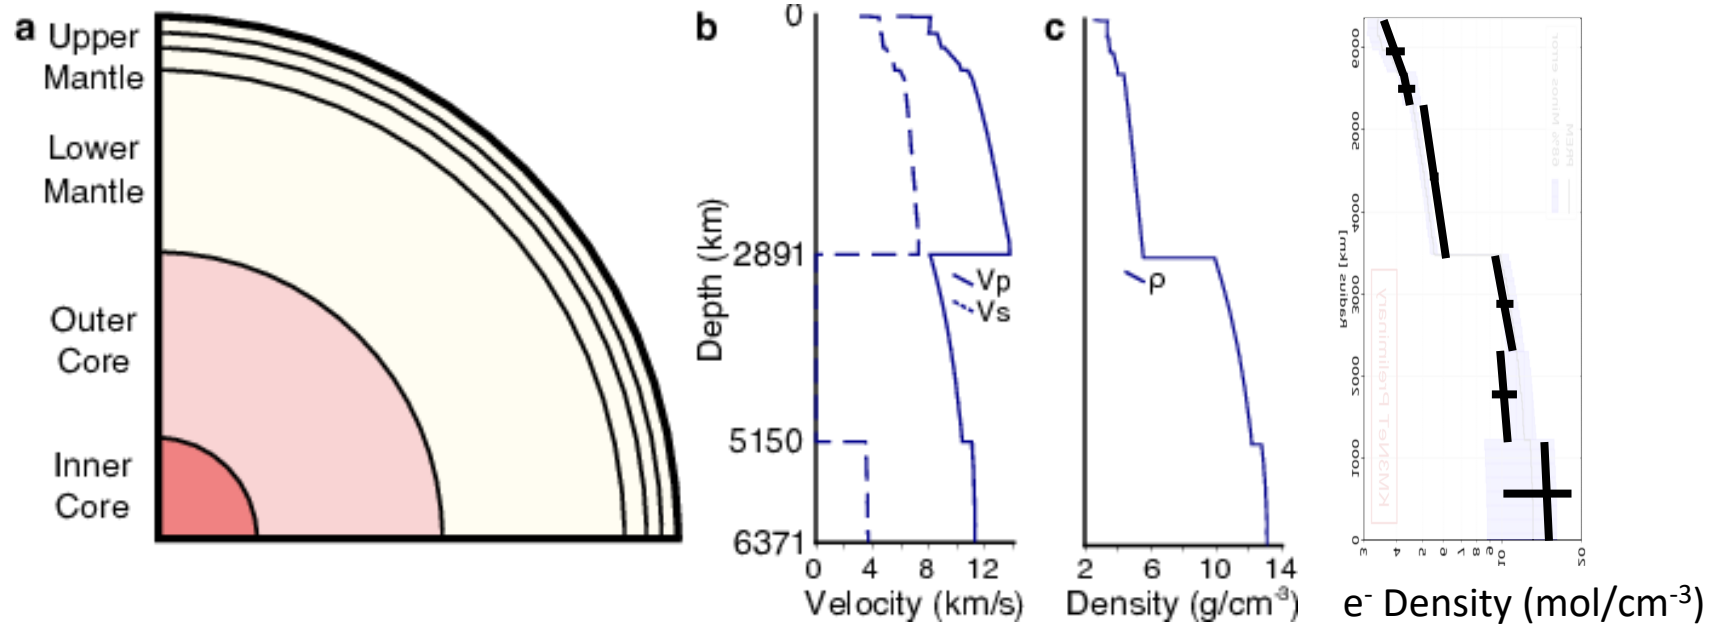

What neutrinos may be able to give us in the next 10 years

What neutrinos may be able to give us in the next 10 years

What neutrinos may be able to give us in the next 10 years

How would we go about combining this into an improved Earth model?

Personal Question: How are the usual 3 curves combined anyway?
