

Round Table on Open Science and Open data

Kati Lassila-Perini
(Helsinki Institute of Physics, Finland)

Bruno Khelifi
(APC/Université Paris-Cité, France)

Adrien Matta
(LPC Caen, France)

Open Science, as defined by UNESCO, “ *is a set of principles and practices that aim to make scientific research from all fields accessible to everyone for the benefits of scientists and society as a whole. Open science is about making sure not only that scientific knowledge is accessible, but also that the production of that knowledge itself is inclusive, equitable and sustainable.*”

NUPECC 2024 Long Range Plan
