Short SMC meeting / IRN Terascale

April 2024 - Frascati

Organisation

- How could we make things more efficient?

  - The call for abstracts seems to work fine

  - O(1 week) after the call is closed, we could organise a zoom meeting amongst conveners to discuss overlaps / sharing / schedule accommodations to make this more efficient

    - We can organise/chair this meeting but we would like to conserve the autonomy of the conveners to organise their sessions

    - Other ideas?

Budget

- Same 10% cut as last year - our total 2024 budget is 18keuros.

- Good attendance for this meeting in Frascati (62) :)

- Thanks to Emanuele and Roberto for the organisation and for finding the money to pay for all the local costs of organisation and food!

- After mission reimbursement for this round (transfers requested/made already)

  - 7.5 keuros remaining for the fall meeting

- Same procedure foreseen in the fall: collecting costs ahead of the meeting / encouraging those who can to use other sources of fundings

Next meeting(s)

- Fall meeting in France:
  - Any blocking dates?
    - A doodle will be organised taking these into account later this week

  - Any volunteers? Any possibility of local fundings?
    - Paris ? Too expensive?
    - (Last time in Lyon : 2011, wink wink :D)

  - Special topics?
    - Discussed having some kind of ML focused session - maybe some hands-on / tutorial / introductory session (could be extra time before / after the workshop itself)

- 2025-2026:
  - Any international partner to host one of the workshops next year or in 2026?
