

Rencontres Jeunes Physcien.ne.s 2024

vendredi 19 avril 2024 - vendredi 19 avril 2024

La Doua

Recueil des résumés

Contents

Introduction speech	1
How to beat the 2nd law (at least 90% of the time)	1
Active straining of Balkans : insights from spatial geodesy (InSAR, GNSS)	1
Nanothermics: ultrafast heat exchange at solid and liquid interfaces	1
Probing the Universe with galaxy clusters : the special case of exotic strong lensing	1
Active Spinning Matter	1
Optical Amplifier for Space Application	1
Optimal control of the navigation of brownian particles in disordered environments	2
Exploring neutrino interactions with DUNE experiment	2
Box modelling of the Bistable Dynamics of Ocean Circulation under Antarctic Ice Shelves	2
Slowing-down of the relaxation time during subcritical rupture in paper and filled elastomers	2
Observing Earth-like exoplanets with future giants telescopes	2
Comment les virus entrent-ils dans le noyau de nos cellules ? Propriétés géométriques et mécaniques de l'interaction d'un virus avec un pore biologique	2
Sheared and compressed granular media, an analogue experiment to study earthquakes dynamic	3
Can anisotropic electrical conductivity lead to dynamo action in spiral-arm galaxies?	3
Design of a phantom for the development of a smart textile device for lymphedema monitoring	3
Online Radiation Induced Attenuation measurements of Radiophotoluminescence Dosimeters irradiated with X-rays: Dose rate dependence at high doses	3
Physics searches at CMS	3
Fabien Vialla's artistic debut	4

Session 1 / 25

Introduction speech

Auteur correspondant ana-florencia.juarez-saborio@univ-lyon1.fr

Session 1 / 26

How to beat the 2nd law (at least 90% of the time)

Auteur correspondant nicolas.barros@ens-lyon.fr

Session 3 / 27

Active straining of Balkans : insights from spatial geodesy (In-SAR, GNSS)

Auteur correspondant aimine.meridi@univ-lyon1.fr

Session 1 / 28

Nanothermics: ultrafast heat exchange at solid and liquid interfaces

Auteur correspondant margherita.vittucci@univ-lyon1.fr

Session 1 / 29

Probing the Universe with galaxy clusters : the special case of exotic strong lensing

Auteur correspondant quentin.basto@univ-lyon1.fr

Session 1 / 30

Active Spinning Matter

Auteur correspondant romane.braun@ens-lyon.fr

Session 2 / 31

Optical Amplifier for Space Application

Auteur correspondant alberto.facchini@univ-st-etienne.fr

The aim of the thesis work is to investigate the behavior of rare-earth-based optical amplifiers in a harsh environment from the perspective of ionizing radiation, such as that which characterizes space applications. To achieve this, an experimental/simulative approach is used to gain a comprehensive understanding of photonic systems.

Session 2 / 32

Optimal control of the navigation of brownian particles in disordered environments

Auteur correspondant kevin-gabriel.bilai-biloa@univ-lyon1.fr

Session 2 / 33

Exploring neutrino interactions with DUNE experiment

Auteur correspondant g.de-lauretis@ip2i.in2p3.fr

Session 2 / 34

Box modelling of the Bistable Dynamics of Ocean Circulation under Antarctic Ice Shelves

Auteur correspondant louis.saddier@ens-lyon.fr

Session 2 / 35

Slowing-down of the relaxation time during subcritical rupture in paper and filled elastomers

Auteur correspondant chloe.braux@univ-lyon1.fr

Session 3 / 36

Observing Earth-like exoplanets with future giants telescopes

Auteur correspondant valentin.fonteneau@univ-lyon1.fr

Session 3 / 37

Comment les virus entrent-ils dans le noyau de nos cellules ? Propriétés géométriques et mécaniques de l'interaction d'un virus avec un pore biologique

Auteur correspondant kassandra.gerard@ens-lyon.fr

Session 3 / 38

Sheared and compressed granular media, an analogue experiment to study earthquakes dynamic

Auteur correspondant eliot.saurety@univ-lyon1.fr

Session 4 / 39

Can anisotropic electrical conductivity lead to dynamo action in spiral-arm galaxies?

Auteur correspondant paul.gomez212001@gmail.com

Session 4 / 40

Design of a phantom for the development of a smart textile device for lymphedema monitoring

Auteur correspondant anna.bublex@insa-lyon.fr

Session 4 / 41

Online Radiation Induced Attenuation measurements of Radio-photoluminescence Dosimeters irradiated with X-rays: Dose rate dependence at high doses

Auteur correspondant aditya.raj@univ-st-etienne.fr

Session 4 / 42

Physics searches at CMS

Auteurs correspondants: e.jourdhuy@ip2i.in2p3.fr, d.amram@ip2i.in2p3.fr

By David Amram et al

Session 3 / 43

Fabien Vialla's artistic debut
