

# Tracking celestial and Carrollian theories

*vendredi 21 juin 2024 14:30 (1 heure)*

In this talk, I will present recent developments towards formulating a holographic correspondence for asymptotically flat spacetimes. In particular, I will discuss the role of newly uncovered symmetries in the so-called celestial and Carrollian holographic proposals.

**Orateur:** DONNAY, Laura (SISSA)

**Classification de Session:** Formal theory
