

Status of PSD study

- Plan

- Simulation [w/ scintillation decay time constants in G4]
 - Crystal+fiber (initially implemented by Herve) ✓
 - Add scintillation property for ZnWO₄ in the simulation

- Issue

- Still some 🐞 with the scintillation property settings
 - ⇒ WIP, re-checking the numbers that input
 - ⇒ Checking with the simple geometry (one single ZnWO₄ cube)
 - ⇒ Checking the process by particle types.
- Hopefully can be solved asap 🙌
