

AISSAI center : AI for Science, Science for AI

vendredi 22 novembre 2024 11:10 (25 minutes)

The CNRS AI Center for Science and Science for AI (AISSAI, <https://aissai.cnrs.fr/>) aims to structure and organize cross-disciplinary actions involving all CNRS institutes at the interfaces with AI. AISSAI became in January 2024 a CNRS support and research unit (UAR2036). The center fosters dialogue between scientific disciplines interacting with AI, addresses domain-specific strategic issues and more generally aims to accelerate scientific discovery in all CNRS scientific fields (physics, chemistry, materials, biology, ecology, human sciences, etc.). After a brief presentation of the AISSAI center, I will discuss its main scientific actions, focusing on the successful scientific program of the past IN2P3 semester.

Auteur principal: DONINI, Julien (UBP/LPC/IN2P3)

Orateur: DONINI, Julien (UBP/LPC/IN2P3)

Classification de Session: Friday morning

Classification de thématique: Training, courses, tutorials, open datasets and challenges
