eLog setup

Clock@LPNHE, November 13th 2024

elog

Setting up a standalone elog for all timing related activities: http://lpnp387:8080/ (username: lpnhe)
- General (like log installation instructions)
- LPNHE TDM test bench
- LPNHE GNSS-clock (previously using the MIDAS instance integrated elog, to be moved)
- TBD: J-PARC and HK installation
- CERN activities?

Similar to the standard elog system used in ND280/T2K
 - unclear what will be the official tool for HK
 - likely every group will do their own with a backup to the main DB system

Temporarily disabled username/password: will restore this asap
