

Programme des sessions

15-17 juin 2026

International Conference on 3D dosimetry (IC3DDose) 2026

*New materials and readout methods for advanced and 3D
dosimetry*

Caen

lun. 15 juin

13:50

New materials and readout methods for advanced and 3D dosimetry

Session | Site: Caen | Responsables de session: Marek Kozicki, Sam Beddar

13:50 - 14:10 **Cherenkov imaging dosimetry of heterogenous phantom in the context of a MR-Linac**

Orateur

Audran Poher

14:10 - 14:30 **Bimodal Ga₂O₃-based X-ray detectors for FLASH therapies**

Orateur

Patrick Pittet

14:30 - 14:50 **Optimising the yield of optically stimulated luminescence in BaF₂**

Orateur

Jacob Christian Warming

14:50 - 15:10 **Planar Dose Imaging in Non-Homogeneous Media Using a Thin Plastic Scintillator**

Orateur

Nicolas Drouin

15:10
