

# OSCARS

Open Science Clusters' Action  
for Research & Society

## Funded Project

### EHRI-KG

Presenter: Mike Bryant, NIOD,  0000-0003-0765-7390

Implemented by

**niod**

institute for war,  
holocaust and  
genocide studies

KAZERNE  
DOSSIN 

Funded by  
the European Union

## What problem(s) are you going to solve?

**Trans-national research** into the **Holocaust** can be challenging due to:

- **fragmentation** caused by destruction of evidence, migration, and other issues
  - **scale** of historical documentation and its geographic dispersal
  - **multilinguality** and **diversity** of collection holders
-

## What are you planning to do to solve the problem?

**EHRI-KG** will develop a comprehensive **Linked Open Data (LOD) Knowledge Graph**

Building on the archival data on the **EHRI Portal** (<https://portal.ehri-project.eu/>) the Knowledge Graph will provide LOD access to information about sources, collection holders, people, places, and more.

The technical approaches to building the KG will be adaptable by collection holders seeking to make their archival metadata more accessible.

---

## What will be the results and how do you plan to make them available to the broader community?

EHRI's Knowledge Graph will be **in production** and connected to the wider ecosystem of LOD sources.

Outputs will be integrated into **EOSC** via cluster project **SSHOC**.

All code and resources will be **open source** and **documented** for re-use.

---

## Who is doing it?

**Herminio García González**

Data Integration Specialist at Kazerne Dossin
