

GATE Scientific meeting 2025

mardi 1 avril 2025 - jeudi 3 avril 2025

NCSR DEMOKRITOS

Recueil des résumés

Contents

GATE presentations	1
9:30 - 9:50 - Introduction in GATE MC simulation toolkit (D. Sarrut / L. Maigne)	1
Introduction in GATE MC simulation toolkit (David Sarrut / Lydia Maigne)	1
GATE 10 status (David Sarrut)	1
GATE simulations of a multi-detector geometry: combining the total body J-PET with a brain insert (M. Rädler)	1
Gate implementations for Monolithic Crystals (Marc Granado-Gonzalez)	1
GateRTion v2: A reference GATE 10 version for ion beam therapy (Martina Favaretto)	1
Development of techniques for radionuclide imaging and dosimetry (Matthew Strugari)	1
GATE activities @ BIOEMTECH (Panagiotis Papadimitroulas)	2
Gate activities at DeSIs-IPHC (Lucia Victoria Garcia Garcia)	2
GATE activities @ Orsay (Olga Kochebina)	2
Prototype of GATE v9.1 workflow for BNCT dosimetry on ICRP110 phantoms (Daniele Pistone)	2
The GATE MARIM database (Lydia Maigne)	2
Validation of GateRBEActor for carbon ion pencil beam therapy (Yihan Jia)	2
OpenGATE for helium ion beam commissioning at the MedAustron iontherapy center (Hermann Fuchs)	2
Photon Last Vertex Splitting: A Variance Reduction Technique applied to LINAC out of field dose computation (Maxime Jacquet)	3
GATE activities @ NCBJ (Wojciech Krzemien)	3
Development of chemistry and biodose actors in GATE 10 (Alexis Perefa)	3
Monte Carlo Simulation of Dose Enhancement Around Gold Nanoparticles for the Development of a Nanoparticle-Doped Dosimetric Gel (Alexandre Ocadiz)	3
Simulation of triple coincidences on a dual-ring, long-axial PET using GATE (Dimitrios Thanasis / Dhimitri Calamani)	3

81

GATE presentations

GATE presentations / 82

9:30 - 9:50 - Introduction in GATE MC simulation toolkit (D. Sarrut / L. Maigne)

83

Introduction in GATE MC simulation toolkit (David Sarrut / Lydia Maigne)

84

GATE 10 status (David Sarrut)

85

GATE simulations of a multi-detector geometry: combining the total body J-PET with a brain insert (M. Rädler)

86

Gate implementations for Monolithic Crystals (Marc Granado-Gonzalez)

87

GateRTion v2: A reference GATE 10 version for ion beam therapy (Martina Favaretto)

88

Development of techniques for radionuclide imaging and dosimetry (Matthew Strugari)

89

GATE activities @ BIOEMTECH (Panagiotis Papadimitroulas)

90

Gate activities at DeSIs-IPHC (Lucia Victoria Garcia Garcia)

91

GATE activities @ Orsay (Olga Kochebina)

92

Prototype of GATE v9.1 workflow for BNCT dosimetry on ICRP110 phantoms (Daniele Pistone)

93

The GATE MARIM database (Lydia Maigne)

94

Validation of GateRBEActor for carbon ion pencil beam therapy (Yihan Jia)

95

OpenGATE for helium ion beam commissioning at the MedAustron iontherapy center (Hermann Fuchs)

96

Photon Last Vertex Splitting: A Variance Reduction Technique applied to LINAC out of field dose computation (Maxime Jacquet)

97

GATE activities @ NCBJ (Wojciech Krzemien)

98

Development of chemistry and biodose actors in GATE 10 (Alexis Perefá)

99

Monte Carlo Simulation of Dose Enhancement Around Gold Nanoparticles for the Development of a Nanoparticle-Doped Dosimetric Gel (Alexandre Ocadiz)

100

Simulation of triple coincidences on a dual-ring, long-axial PET using GATE (Dimitrios Thanasis / Dhimitri Calamani)
