# Data Handling & Data Processing

(Level 1 – v11r1 and v11r2)

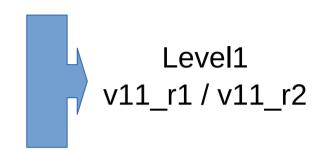

#### L. Marcelli

37th JEM-EUSO Collaboration Meeting Paris, June 4, 2025

# "Current" (mid April) dataset

Pouch003: sessions 01 - 14 → complete dataset

Pouch004: sessions 15 - 44 → complete dataset

Pouch003\_v2: sessions 45 **150** → partial dataset (10 or 20 files/session) Level0

→ complete dataset for sessions: 64, 65, 66, 67 113, 114, 115, 116, 119, 120, 124, 126

- → Data on ground: about 40 sessions (excluding commissioning)
- → Data on board: about 106 sessions !!!!

# Session status at mid April

#### **Latest performed sessions**

```
03.04.2025 - session 150 \rightarrow old software
02.04.2025 - session 149 \rightarrow old software
05.03.2025 - session 148 \rightarrow old software
26.02.2025 - session 147 → old software
21.02.2025 - session 146 \rightarrow old software
29.01.2025 - session 145 \rightarrow old software
23.01.2025 - session 144 \rightarrow old software
. . .
05.12.2024 - session 138 → New software with new dac10 file
                               Usb pen appears as unformatted after the session – no data
25.11.2024 - session 137 \rightarrow old software (as 134 and before)
05.11.2024 - session 136 \rightarrow old software (as 134 and before)
04.11.2024 - session 135 → New software with new dac10 file
                                Usb pen appears as unformatted after the session – no data
```

# Attempts to update dac10 file

Many attempts during last months but something went wrong: no data on usb pen.

- » different pens used;
- » new software sent twice to the ISS.

Starting from session n. 151 Mini-EUSO is not working properly.

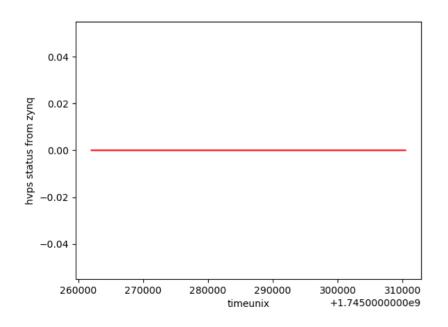

Sessions performed with two different pens:

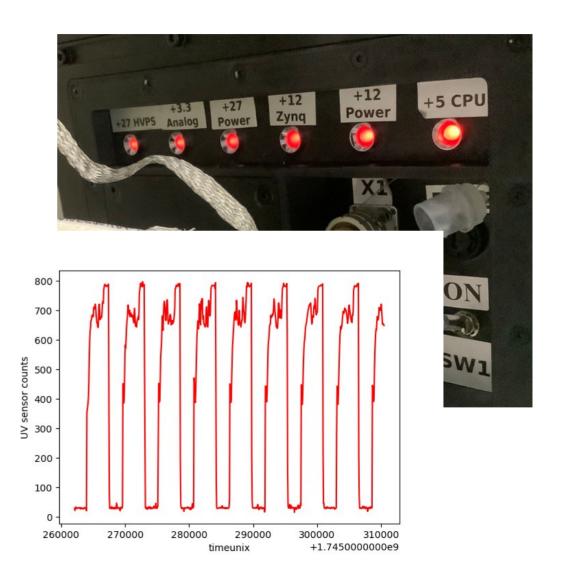

```
27.05.2025 - pen 16 - session 156
22.05.2025 - pen 16 - session 155
21.05.2025 - pen 16 - session 154
28.04.2025 - pen 14 - session 153
24.04.2025 - pen 14 - session 152
21.04.2025 - pen 14 - session 151
03.04.2025 - pen 14 - session 150
```

CPU and Zynq seem working well:

- day/night transition ok
- Files stored

hvps cathode always 000 000 000

Power

#### CPU and Zynq seem working well:

- day/night transition ok
- Files stored

hvps cathode always 000 000 000

```
19:07:18.772839 info: set port to non-blocking

Debugging on going on the Lab Model!!!

# **Data Processing**

### ETOT: Level0 data

VM with ROOT 6.20/06 and python 2.7.5 used

Etot software version: etot version 1.8, libetot version 1.7

# V11.r1

# L1 software - summary

It makes the clone of LevelO data and:

- 1- corrects the behaviour of the 2 PMTs with bit-shift in the counts;
- 2- adds orbital info (ISS, Sun and Moon positions); thanks to Michal and Kenji
- 3 corrects the CPU time introducing a time\_offset; thanks to Michal and Kenji
- 4 adds L1 software version info (TTree "texp");
- 5 corrects for "pile-up" in D1 counts;

6 – applies flat flielding correction. thanks to Matteo

# New storage area

Link (use standard JEM-EUSO password):

https://owncloud.roma2.infn.it/index.php/s/ONDmLXJp9PsAObh

# New data processing

Data dowloading (from session 45) is in progress.

New data processing foreseen in the next months.

If you have any request, please let us know!

# Thank you

# Next data processing (waiting for pouch003\_v2 data)

#### **ISS Telemetry:**

- no attitude files: Pavel is managing that with Energia
- telemetry info in L1 files: current or new version?

Responsible: Kenji/Michal/Zbigniew?

#### **Time-offset correction:**

- long time required! Responsible: Kenji/Michal?

#### **Flat Fielding:**

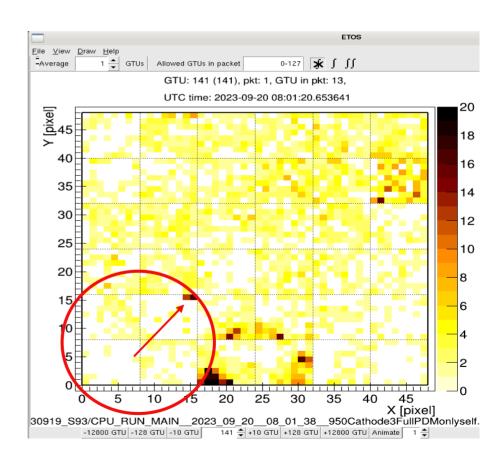

- current or new version? Responsible: Matteo

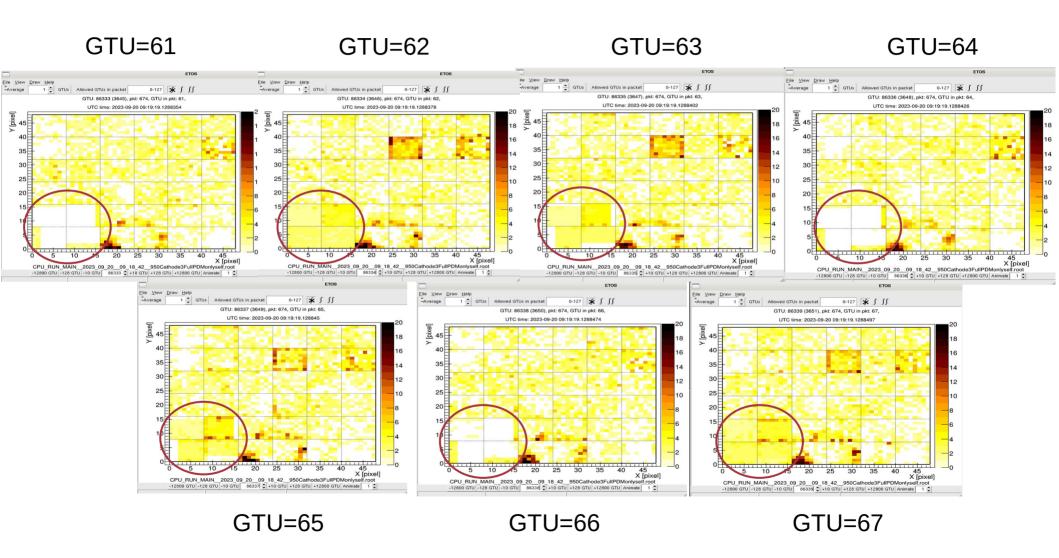

1) left bottom EC with three (or more) noisy pixels → almost always in cathode2 mode or switched off by safety circuit.

Known issue since session 83.

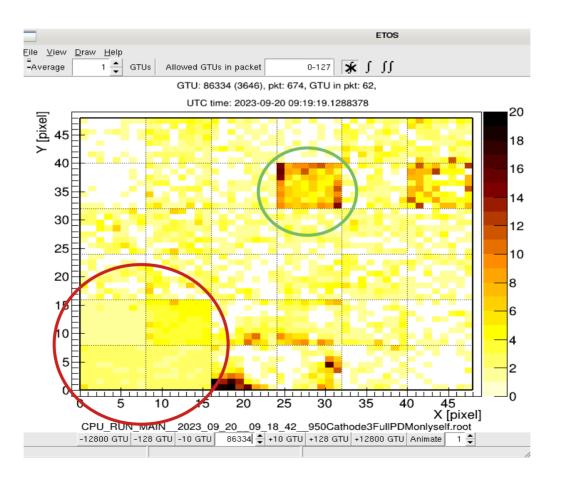

Some pixels added to the trigger pixel mask file since session 92 but the trigger mask seems to be applied not properly.

→ @ ALL: could it be better, in order to safe the instrument, to keep the EC switched off in the future sessions?

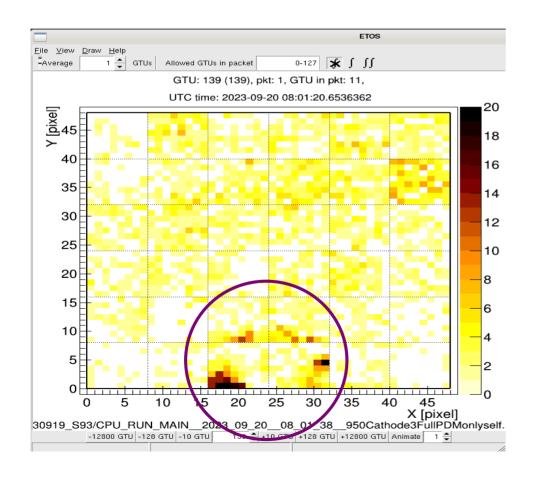

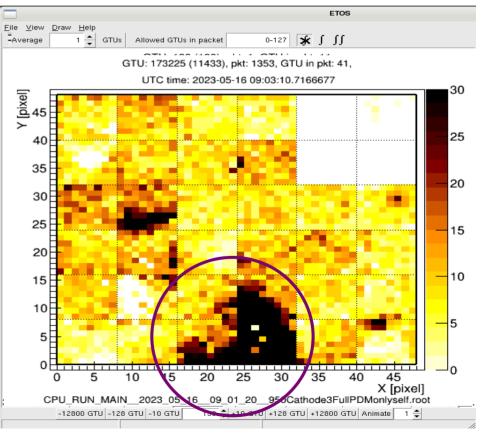

2) minor issue: one PMT of the top central EC connected with the activity of the left bottom EC. It happens only occasionally. But what for the future?

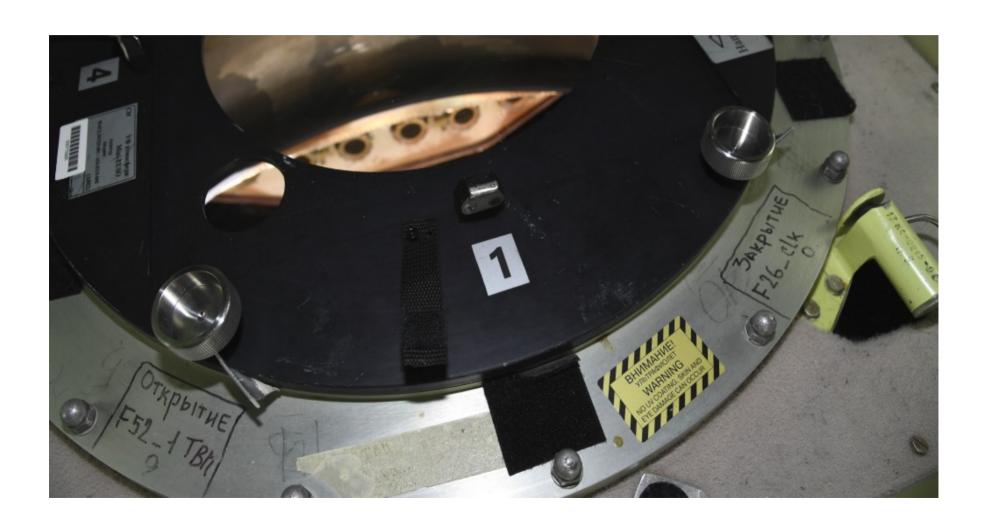

3) bottom central EC: very noisy during some sessions, it is most probably due to the broken latches and how the cosmonaut installs the instrument.

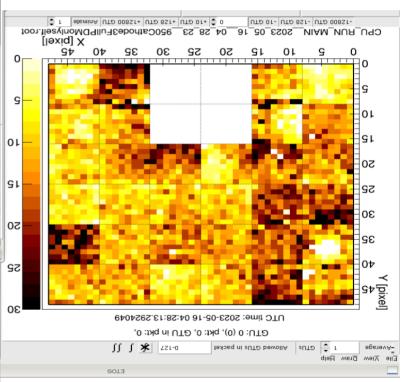

sources move down

# S01 – S54 First pixel mask

Masked pixels:

PMTs with bit-shift issue

All border pixels

# From S92 – New pixel mask

Masked pixels:

PMTs with bit-shift issue

Some border pixels (Matteo's study)

Some bottom pixels to overcome latest problems

```

# From S92 – New pixel mask

Masked pixels:

PMTs with bit-shift issue

Some border pixels (Matteo's study)

Some bottom pixels to overcome latest problems

#### IT DOESN'T WORK!!!!

Some of the masked pixels generate triggers

```
