

# VOEvent+Registry

## Final minor updates for VOEvent 2.1

- Registry: needed for stream discovery.
  - VOEvent stream registered as a CatalogResource.
  - standard-id for VOEvent stream (v2.0 and v2.1)
  - if several streams for same resource: use different capabilities.
  - ADQL query for discovering VOEvent stream is provided
  - proposal to be included in VOEvent 2.1 PR
- Reference Implementations:
  - Update voevent-parse (<https://github.com/timstaley/voevent-parse>)
  - contact main developer, merge into pyvo ?
- Validator: use STILTS with XML schema validation. Implement also in ivoatex?
- VOEvent 2.1 PR: proposed changes will be done, but not for upcoming IVOA (Görlitz)
