(OSTrails) FAIR assessment
Setting up dedicated FAIR profile for astronomy

- OSTrails (EOSC EU project, 8 thematic pilots, 15 national pilot)s
  - Plan (DMP), Track (science knowledge graphs) and Assess (FAIR)

- "Assess" pillar goal: set up FAIRness "tests" , "metrics" and "benchmarks" for each thematic pilot.
  => how do we want to be evaluated?
  => what measure do we want to use to try to improve?

- Started comparing the FAIR principles with VOResource content.
  Started describing tests and metrics. Critical review by IVOA is expected.

- Will be presented at next IVOA (Görlitz). Joint interest DCP+Ops+Reg ?
