

# OSCARS

Open Science Clusters' Action  
for Research & Society

## Funded Project

### **PRIVAGAMS - Services for Privacy Advancement through Generative AI and Model Sanitization**

Presenter: Robert Harb, Medical University of Graz, ORCID: 0009-0001-3427-7054

Implemented by

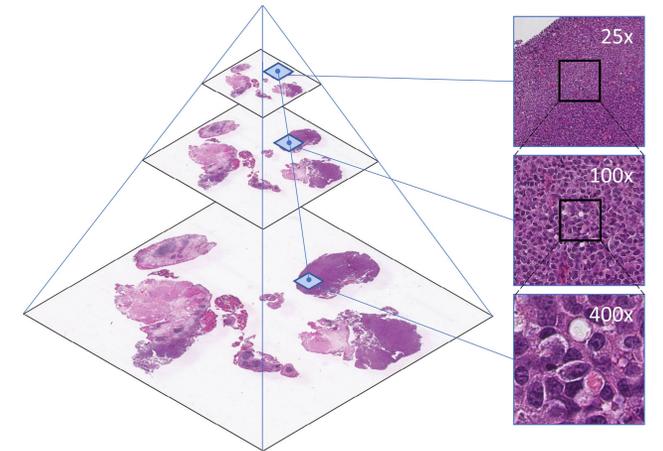

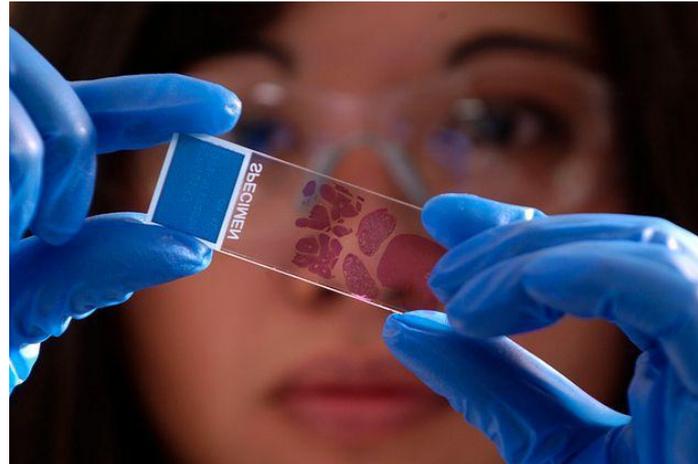

MASARYK  
UNIVERSITY

Funded by  
the European Union

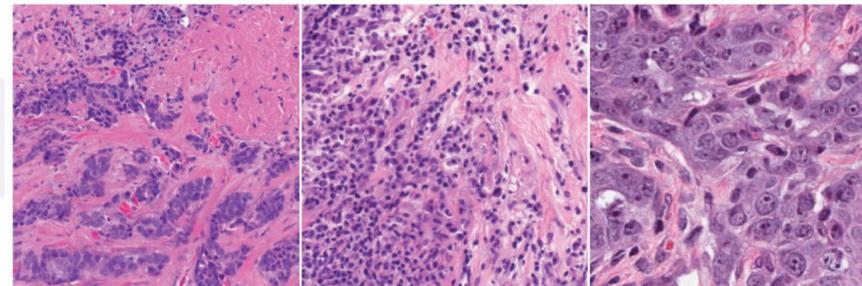

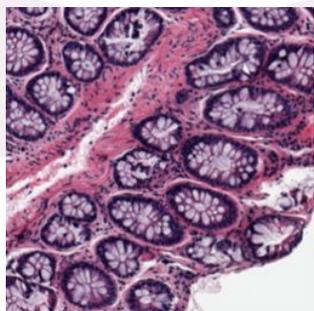

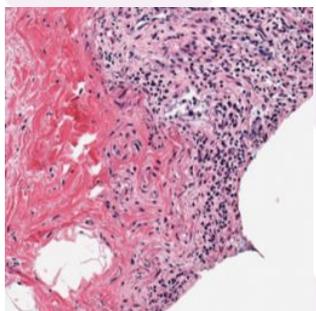

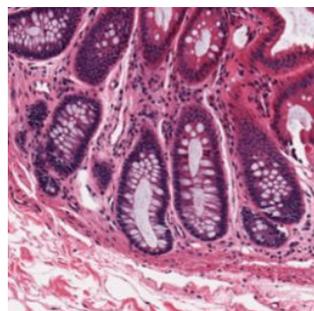

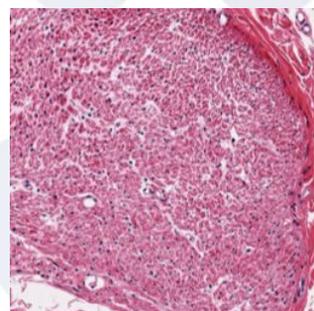

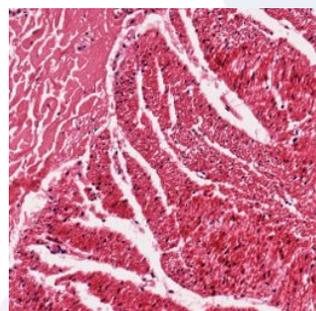

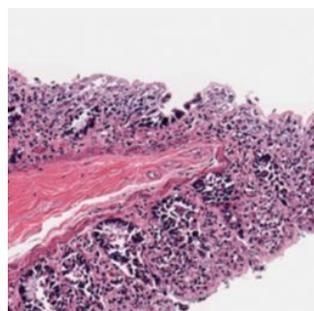

## What problem(s) did you plan to solve?

- Digitization allows large-scale scanning of tissue samples in **Pathology**
- The Biobank in Graz alone holds **over 20 million** glass slides
- These images are an **invaluable resource** for advancements in medicine and AI
- Strict legal frameworks **limit data sharing**, to protect patient privacy
- To foster **Open Science**, we need methods to make data publicly available

What have you done to solve the problem?

Diffusion-based synthetic image generation for histopathological images

Legend: ■ Tumor ■ Stroma ■ Lymphocytic infiltrate ■ Necrosis

## What are the key results achieved to date and how have you made them available to the broader community?

- **Privacy Preserving Generative AI and Model Sanitization** submitted to **ASHPC 2026**
  - **Benchmarking WSI Privacy: A Challenge on Linkage Attacks and Synthetic Data Anonymization** submitted to **ECDP 2026**
  - **Kaggle competition on linkage attacks in Whole Slide Image sharing** (will start soon)
  - **Dataset of synthetic histopathology images** (release through **BBMRI**)
-

## How will you make your results sustainable over time - How will the scientific community/-ies further exploit them?

- **Scientific publications** provide methodological frameworks that guide researchers in advancing synthetic data generation for histopathology
  - **Kaggle competition** will provide a baseline on the risks of synthetic WSI sharing
  - **Dataset of synthetic histopathology images** will give researchers open access to data that's otherwise closed, restricted, or inaccessible due to privacy, ethical, or legal constraints
-

## Who is doing it?

Medical University  
Graz

Robert Harb

Heimo Müller

Technical University  
Vienna

Bernd Saurugger

Andreas Rauber

Masaryk University  
Brno

Jakub Pekar

Vit Musil

Masaryk Memorial Cancer  
Institute
