Open Science Clusters' Action  
for Research & Society

## PaNOSC Competence Centre OSCARS 2<sup>nd</sup> AGM

12 March 2026

Andy Götz (ESRF)  
on behalf of the PaNOSC Community

Funded by  
the European Union

## Background

**PaNOSC represents a cluster of ~25 Analytical Facilities** providing experimental facilities to **> 70000 users/year**

PaNOSC facilities are **User Facilities** and provide Users with photons / neutrons and **many services** which require **different competences**

We identified the different areas and people where we provide competences and setup an email address **competence.centre@panosc.eu**

The **Competence Centre** has been contacted once by Users via this new channel

---

The **PaNOSC CC** has focused on **Mentoring** the **13 PaNOSC OSCARS projects**

- An **online meeting** was organized in May 2025 for all projects:  
<https://indico.esrf.fr/event/203/>

In **2026** we are organizing **1-on-1 meetings with each project** to :

1. Monitor progress through a brief report on completed and upcoming activities and challenges. We also ask about uptake of PaNOSC services
2. At the 1-on-1 meetings we provide advice, help steer the projects to success
3. The Goal is to help sustain them through on-boarding to the PaNOSC EOSC Node

**→ 4 projects have received help so far and 1 more has requested help**
