LS-RI CLUSTER - Competence Center
OSCARS AGM Day 3

R. David - J. Ewbank (ERINHA)
**N. Liaskos (EATRIS)**

17 February, 2026

CCs and OSCARS projects fostering LS-RI Services uses

Hub-and-Spoke Model for CCs:
Turning Projects
into Service Uptake

- ➤ **Integrate** OSCARS outputs into existing RI service portfolios
- ➤ **Deliver** training & hands-on support / assistance
- ➤ **Promote adoption** by domain communities
- ➤ Facilitate **cross-RI service composition**
- ➤ Amplifies OSCARS project results at European level

Competence Centre (CC) Model for LS-RIs

CCs are Key enablers to:

- Increase **visibility** of LS-RI services & nodes
- Increase **service uptake and reuse**
- Foster **cross-RI collaboration and composability**
- Raise **awareness and FAIR literacy**
- Enable **secondary use of data & AI-ready workflows**

Through **Competence Centres** and **LS Nodes**, OSCARS projects are not just funded activities — they become building blocks of a sustainable, interoperable, and AI-ready European Life Science ecosystem within EOSC
