

- 20-24 October 2025 at Valencia
  - <https://agenda.linearcollider.org/event/10594/>
  - ~250 participants (on-site + online)
  - Present : Jesus, Francois, Dirk, Roman, Marc, Angeles, Walid, Irina, Ziad, Paul, Maxim, Hao, Gerard (?) ... qui d'autre?
  - En ligne: Vincent, Jean-Claude ... qui d'autre?
- Encouraging meeting that
  - Showed that the LCF is a solid realisable project
    - With a clear physics case
  - With considerable innovation potential (→ energy upgrades of the machine)
    - Improvements on SCRF
    - many talks on Plasma Wake Field acceleration
      - We (I) may have to better understand potential, delays, limits and timelines
      - Ask (and motivate) also your local colleagues (e.g. APOLLON at LLR, PALLAS at IJCLab)
      - Nice talk by Jana Serhal at DMLAB meeting on PALLAS
  - (My worry) is that we loose a good fraction of this innovation potential for particle physics by a decision for FCC
    - Discipline will have to bundle all capacities on high-field magnets
    - → One way road
