Site: La Doua, Amphithéâtre principal, Domaine de la Doua Institut des Nanotechnologies de Lyon 3 rue Enrico Fermi - 69100 Villeurbanne

10:25 - 11:03 **Surface functionalisation of nanoplatelets for detection of biological nanoobjects in water**

Orateur

Maria Bandurist

10:25 - 11:03 **Mechanical Behaviour of Confined Ferromagnetic Granular Media**

Orateur

Solenn Rodriguez

10:25 - 11:03 **Formation et migration d'instabilités à la surface libre d'un lit granulaire immergé**

Orateur

Camille Porceillon

10:25 - 11:03

Experimental study of the optical response of gold nanobipyramids used as photoelectrochemical electrodes

Orateur

M. Youn NOH

10:25 - 11:03 **Influence of Mantle Rheology on Plume Dynamics, Periodicities and Morphologies**

Orateur

Alexandre Koessler

10:25 - 11:03 **Simulation-Based Inference (SBI) for cosmology with type Ia Supernovae (SNe Ia).**

Orateur

Adam Trigu

10:25 - 11:03 **Realistic simulations for cosmology with type Ia Supernovae (SNe Ia).**

Orateur

Luna Dellazzeri

10:25 - 11:03 **CO2 Reduction by bio-inspired up-converting photonic structures**

Orateur

Eryk Kupiec

10:25 - 11:03

A Traveling-Wave based Ion-Mobility device for isomers selection in InfraRed Multiple Photon Dissociation analysis

Orateur

PengFei Xu

11:05

14:55
