

Diagnostics faisceau DESIR (lignes)

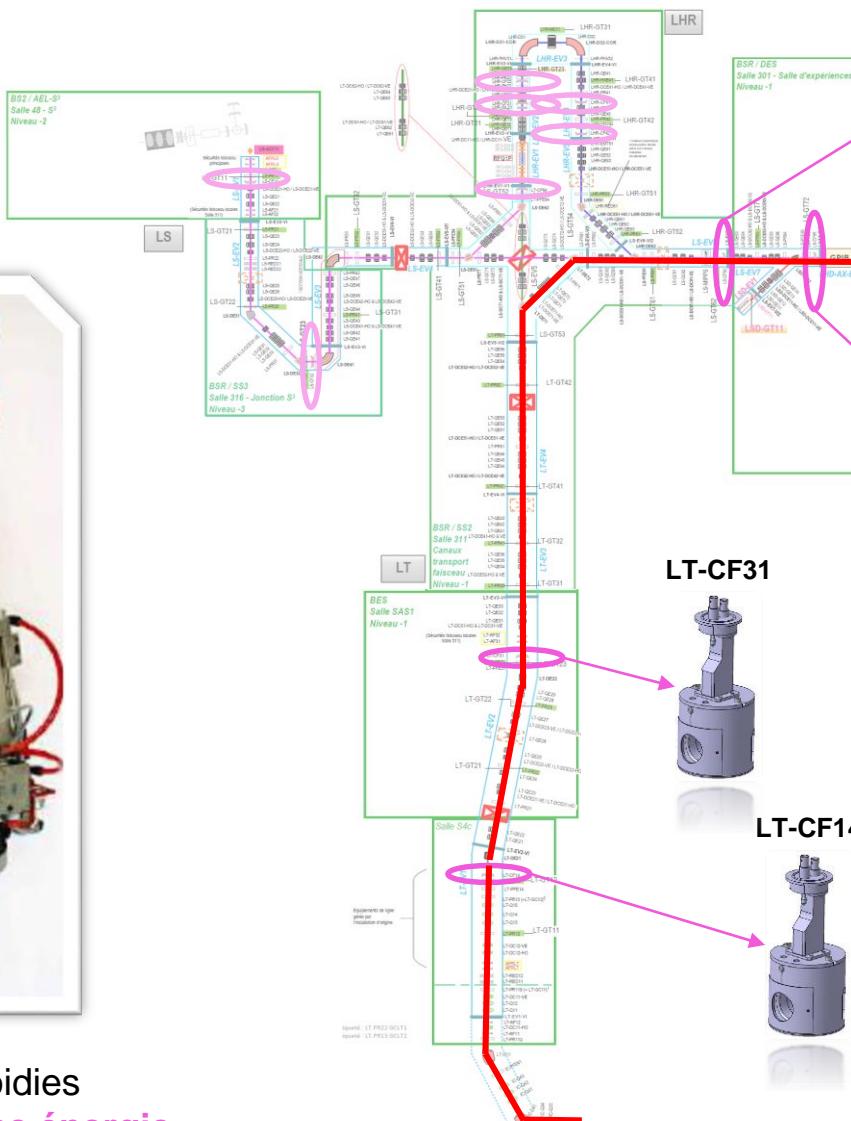

Basse énergie 30 keV
Faible intensité spiral 1, quelques pps ... 10^8 pps

CANIL

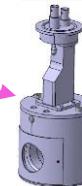

CF non refroidies
faisceaux de **basse énergie**

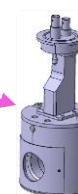

Faisceaux ions stables

LT-CF31

LT-CF14

The image shows a rectangular metal enclosure with various controls. On the left side, there are two circular knobs labeled 'POSITION' and 'TILT'. Above these knobs are four green indicator lights labeled 'GAMMA', 'H-VIN', 'V-VIN', and 'H-VOUT'. Below the knobs are four red indicator lights labeled 'H-VIN', 'V-VIN', 'H-VOUT', and 'V-VOUT'. In the center, there is a large black DB-25 male connector labeled 'COMPUTER/VIDEO INPUT'. To the right of the connector is a small white label with a barcode and some text. At the bottom left, there is a small circular opening with the text 'FUSIONTEK 3D DRIVER'. The top right corner of the device has the text 'DRIVER BOARD'.

Electronique de mesure locale
PICO-LIN

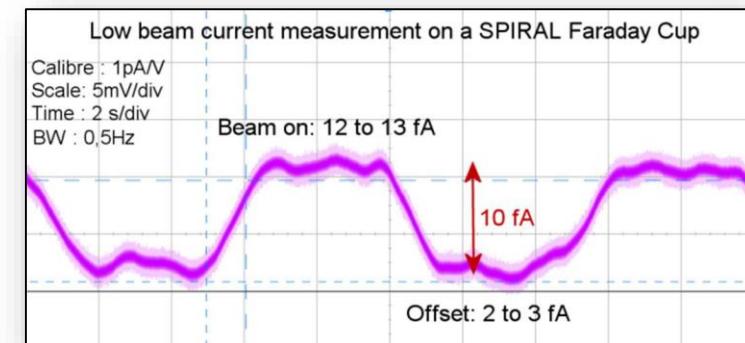

Mesure ABSOLUE d'intensité

- ✓ Diamètre **35 à 40 mm**
- ✓ Puissance thermique max: **qq 10W**
- ✓ Gamme d'intensité: **10 fA à 10 µA**

De qq **10^{4-5}** à **10^{12-13}** pps

Christophe Jamet sur Indico:

«Réseau Instrumentation Faisceau :
Réunion du 27 et 28 mars 2019 ...»

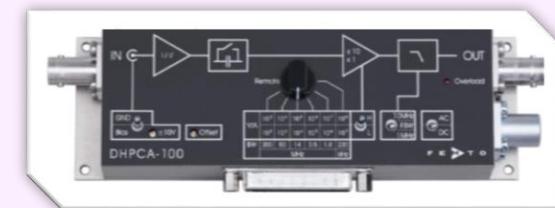

Electronique GANIL « **PICO-LIN** »

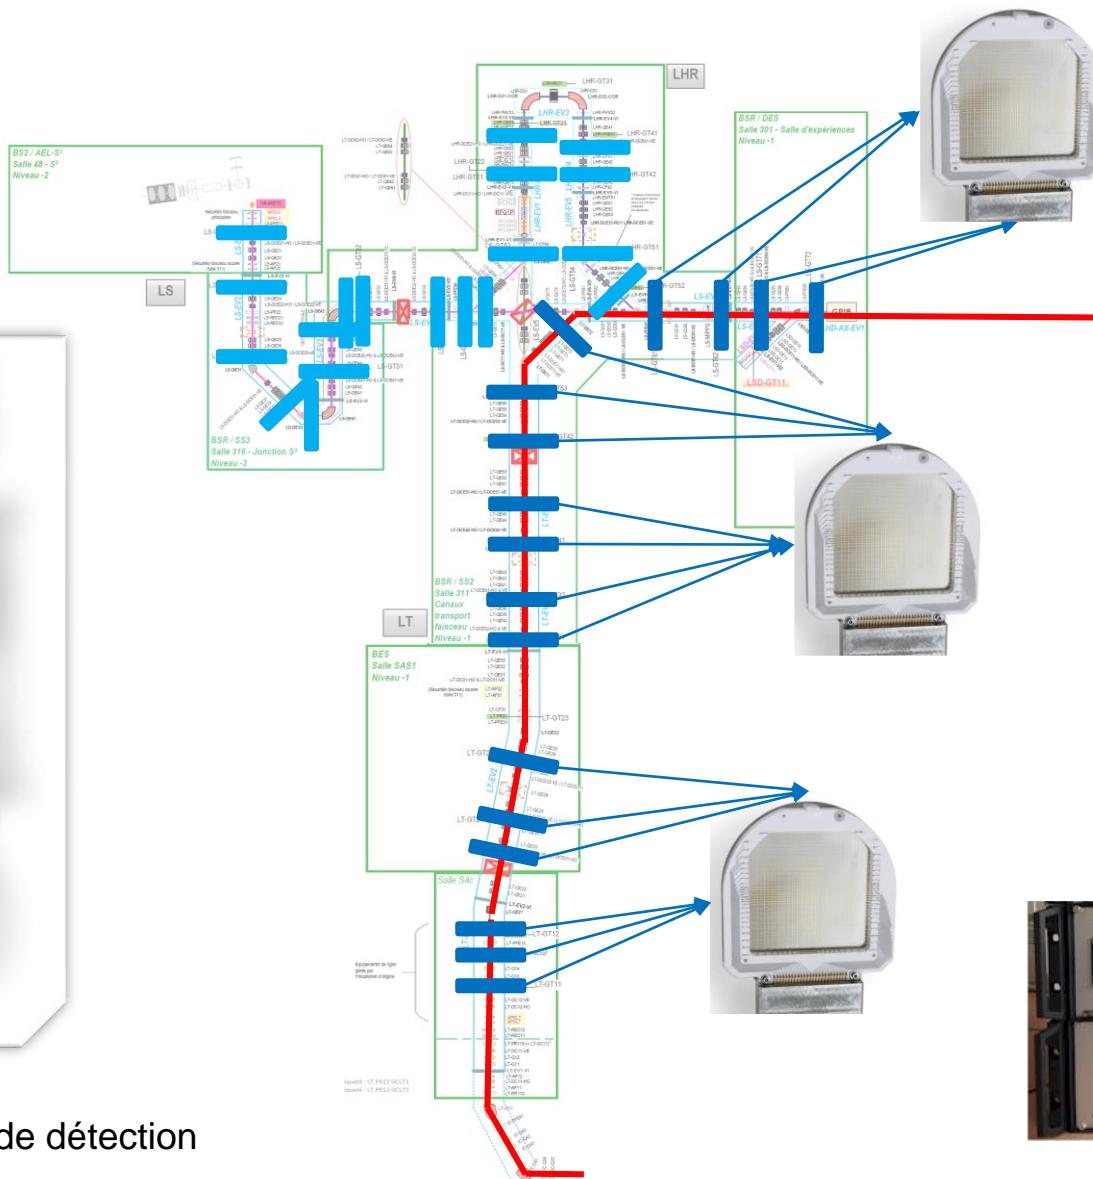

Sensible VS Rapide

- embarqué au dessus de la CF
- Entrée Triax «**bas bruit**»
- **8** Gammes de mesures : **1 pA/V 10 µA/V**

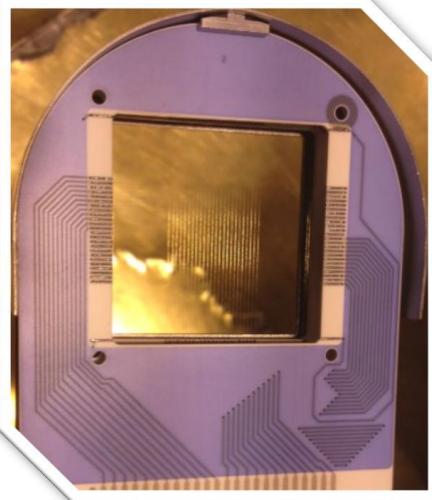

Ampli rapide « **Femto** »

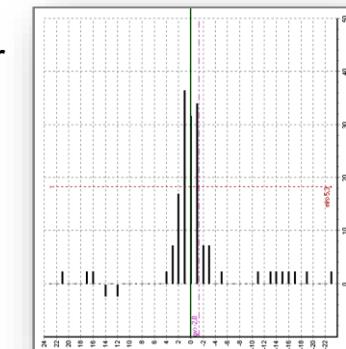

- Pour faisceaux **Bunchés**

Electronique EMS

Visualisation PROFIL horizontal et vertical

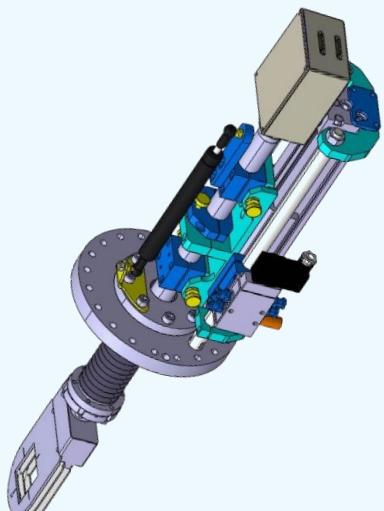

- ✓ **47 fils** dans les 2 plans (X et Y): interaction des ions sur les fils produit un courant électrique **Emission Secondaire EMS**
- ✓ Fils de tungstène doré Diamètre : **70 et 150 µm**
- ✓ Ecarts: **0,5 ou 1 mm**
- ✓ Gamme d'intensité: **1 nA à 10 µA** 10^{9-10} à 10^{13-14} pps

**Visualiser faisceaux alignement**

Delannoy
Tests LIRAT du 16 novembre 2007
6 nA

- Boîtier de connexion embarqué sur propulseur

Jean-Claude Foy ATRIUM-166622

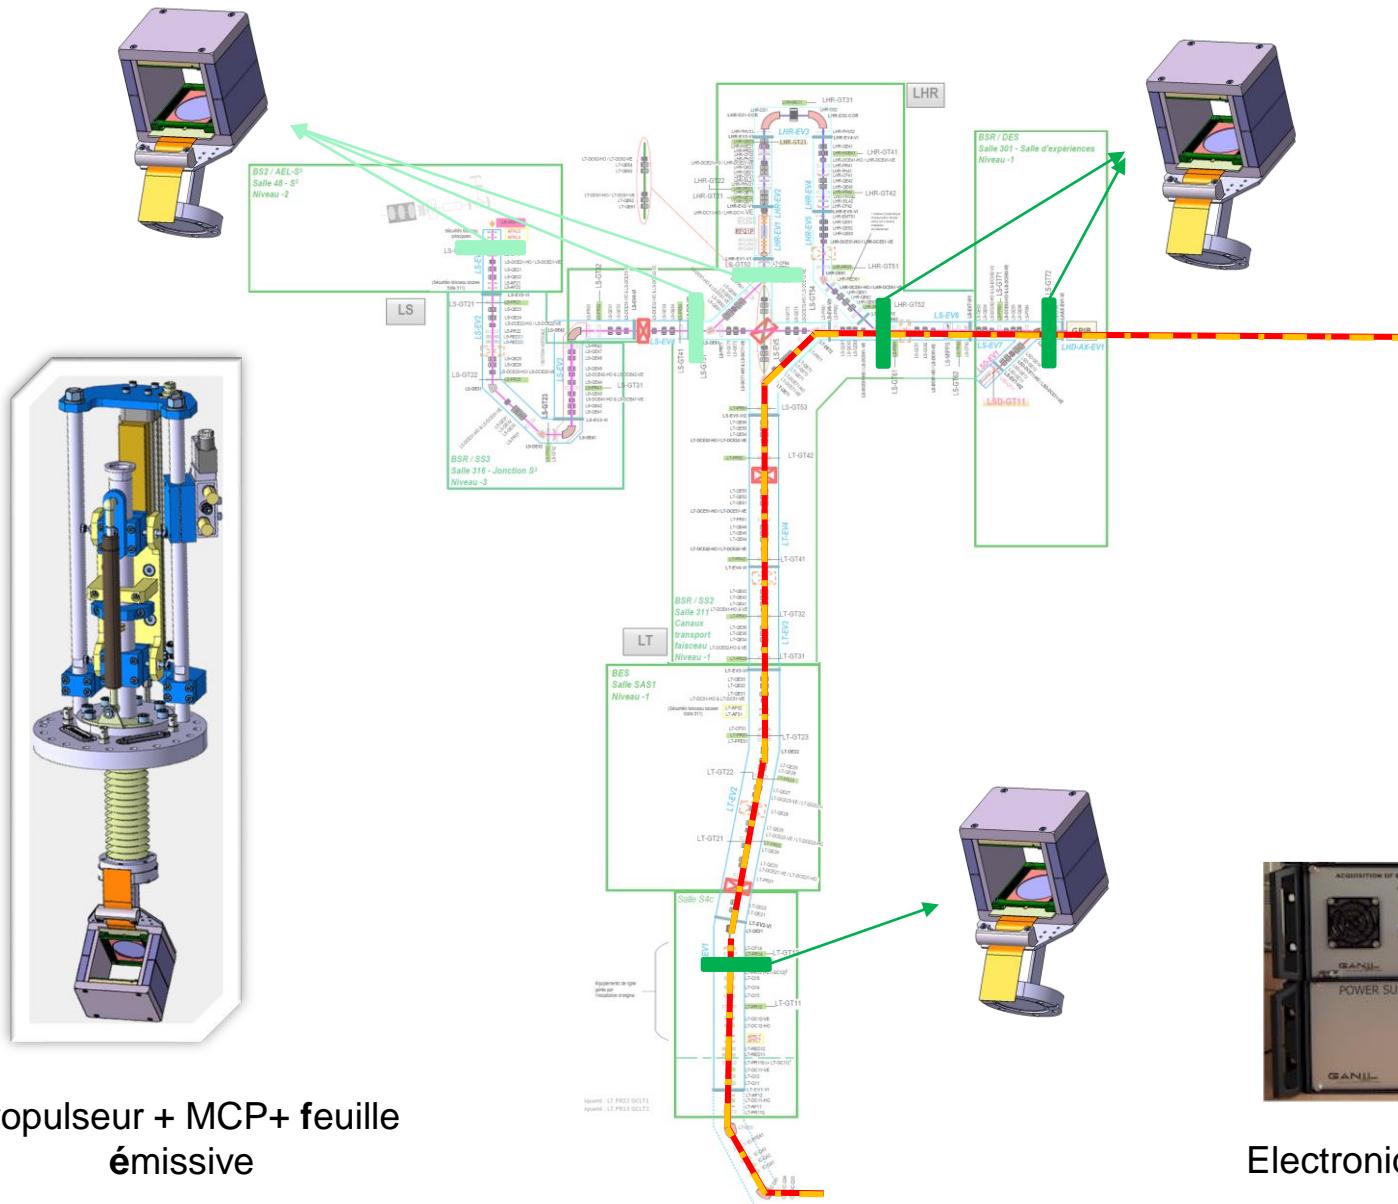

- Électronique GANIL sur Châssis lignes
- 3 voies HT intégrées
- Acquisition données
- Retour état et commande automatismes

Électronique EMS

Profil faisceau et comptage: PFE

Propulseur + MCP+ feuille émissive

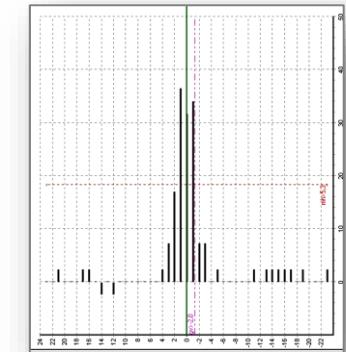

Électronique type EMS modifiée

Visualisation PROFIL horizontal et vertical

- ✓ Profileur à Feuille Emissive **PFE**
- ✓ Feuille d'aluminium: **500 µm**
- ✓ Galette à micro canaux **MCP**: HAMAMATSU F2117-01 gains de 10^4 à 10^7
- ✓ Gamme d'intensité: **10^2 à 10^{10} pps**

Delannoy

Tests LIRAT du 16 novembre 2007
6 nA (10^9 pps)

Visualiser faisceaux très faible intensité + comptage

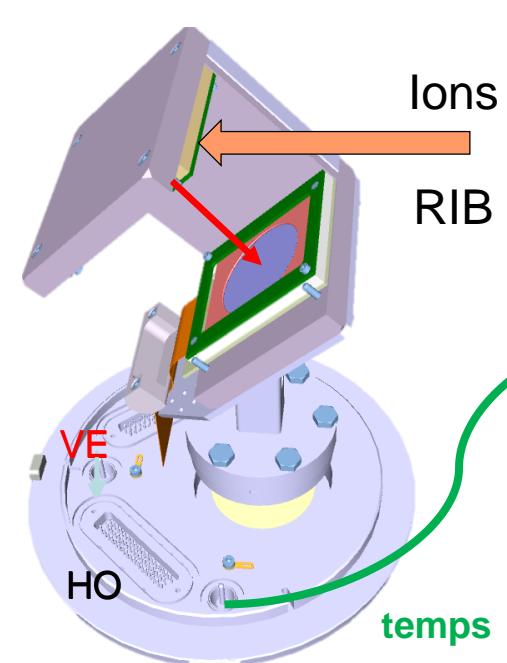

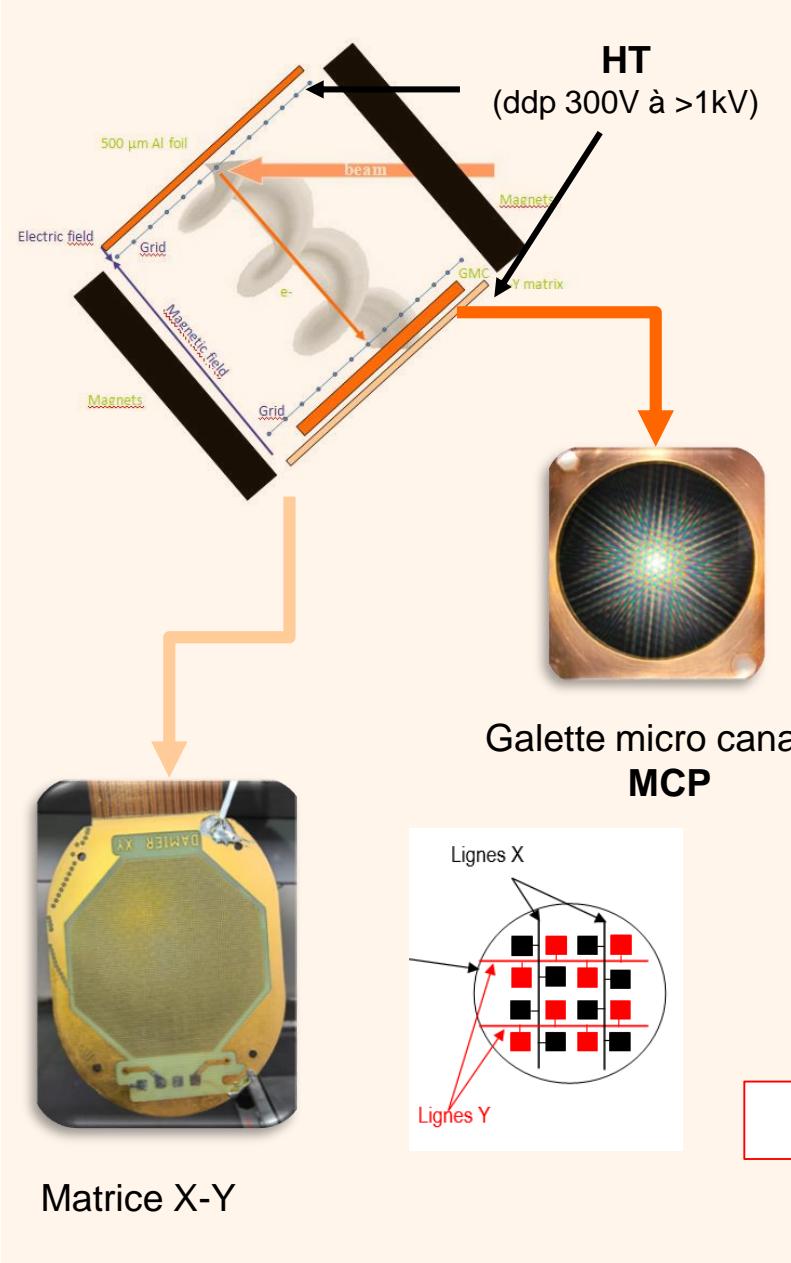

- Connexion sur bride
- 2 sorties **HO** et **VE**
- 2 entrées **HT**
- 1 sortie **temps**
