

Pregramme des sessions

12-14 févr. 2026

Deep CosmoStat Days

Radio Astronomy

CEA/DAP, Cassini

ven. 13 février

11:30

Radio Astronomy

Session | Site: CEA/DAP, Cassini

11:30 – 11:50

Foreground removal in HI 21 cm intensity mapping under frequency-dependent beam distortions**Orateur**

Athanasia Gkogkou

11:50 – 12:10

Generative model for shear inference in the context of radio weak gravitational lensing**Orateur**

Ezequiel Centofanti

12:10 – 12:30

Starlet l1-norm for neutral hydrogen intensity mapping**Orateur**

Pauline Gorbachev

12:30
