Accueil

The conference focuses on the detector R&D activities currently underway at IN2P3 (France) and INFN (Italy). It aims to bring the two communities closer together, foster idea exchange, identify synergies, and promote collaborations.

The event will be organized over five half-day sessions and, for this second edition, it will take place in the INFN National Laboratories in Frascati.

Each half-day session will focus on:

- Photosensors
- Gas detectors
- Solid-state detectors
- Cryogenic detectors & quantum sensors
- Electronics & Lab. infrastructures

**The registration and call for abstract  
will open soon**

We had a very rich meeting. Thanks to the speakers for the interest talks, and to all for the fruitful discussions!!

Please register to the mailing list to get updated on our future actions:
