

MUSI

Pathfinders - Snow White

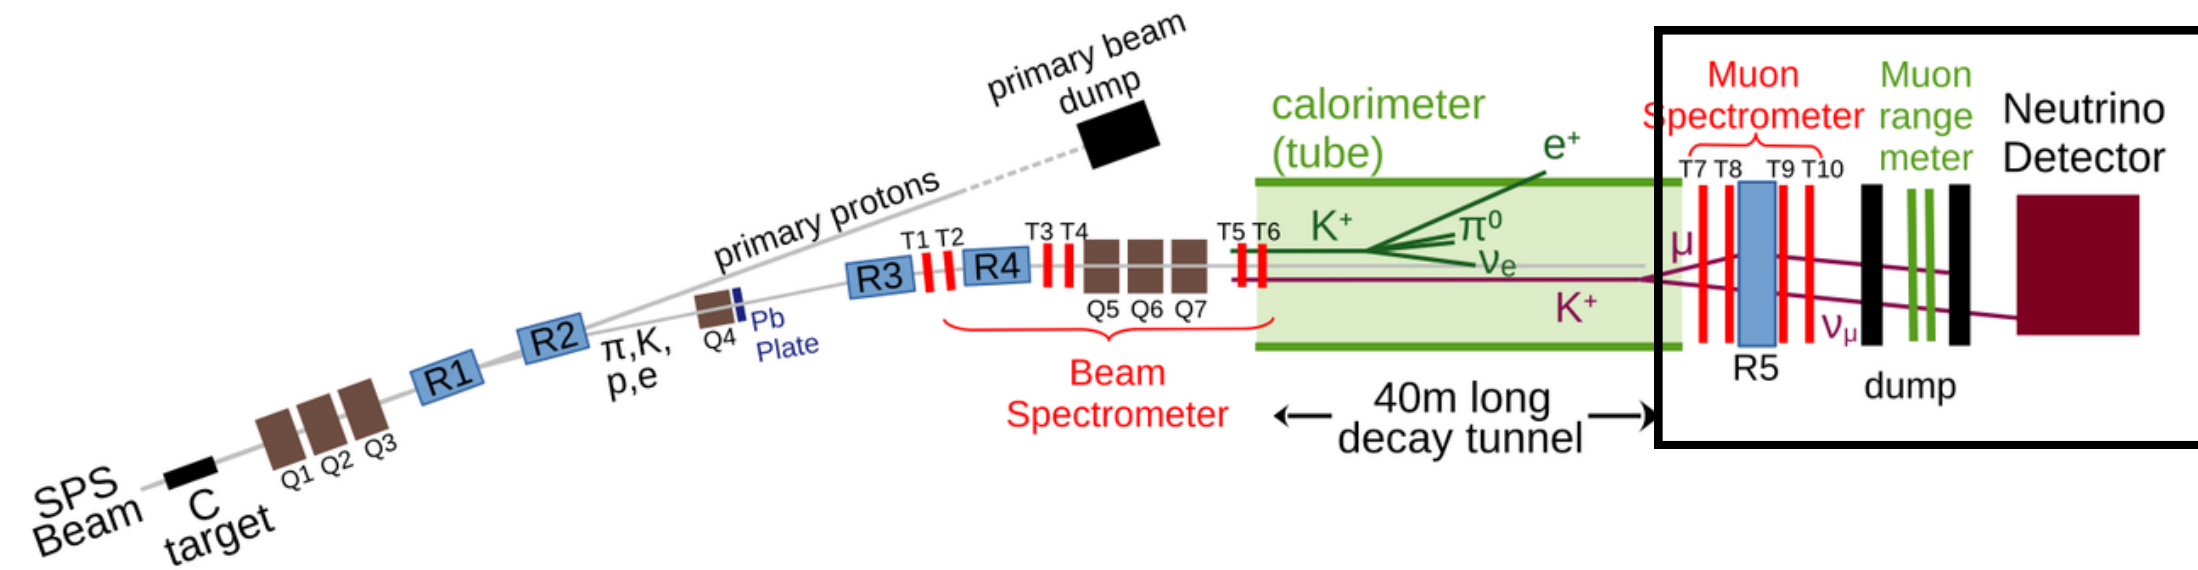

- My name is: Quach Khanh Duc
- I am a 3rd year Undergraduate - License 3 from Vietnam

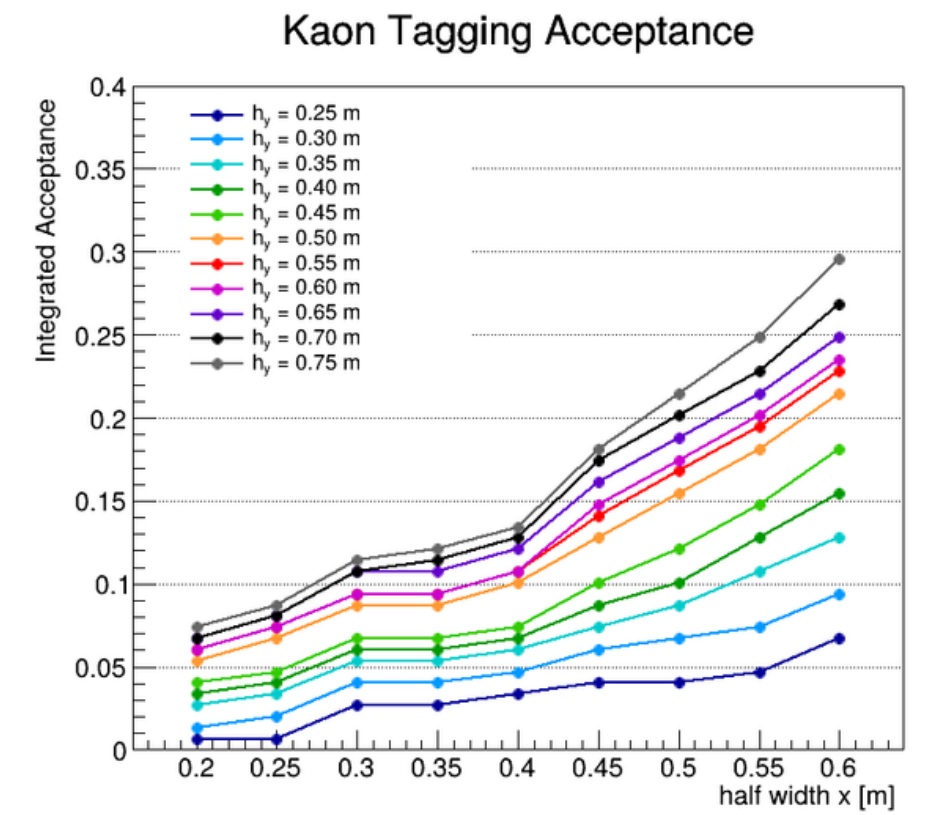

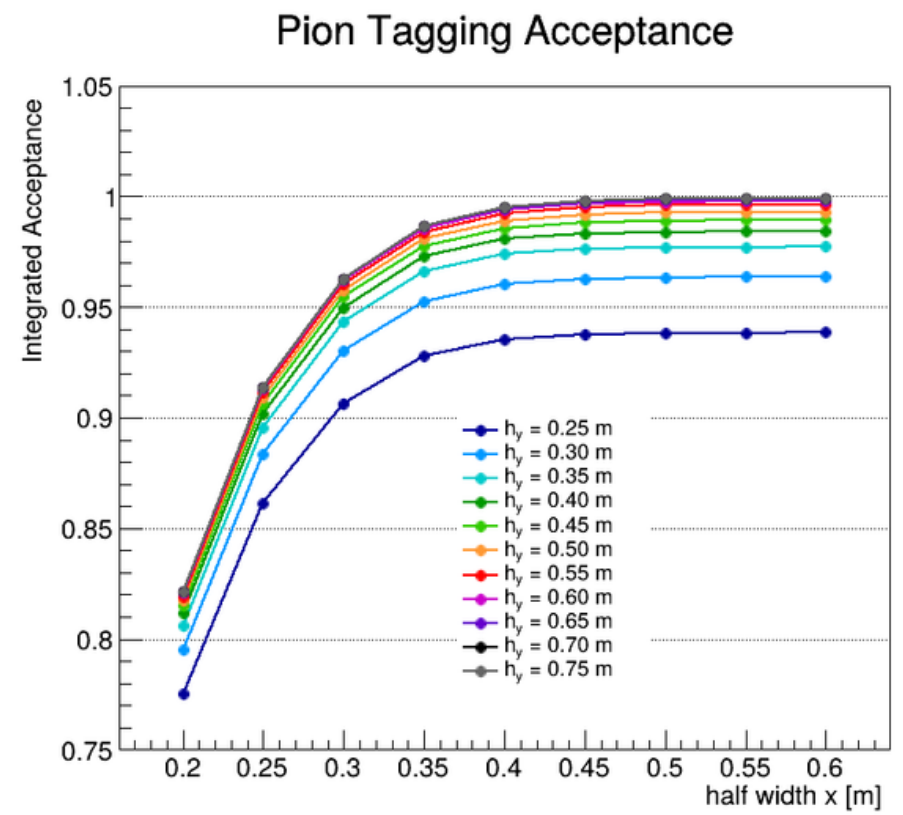

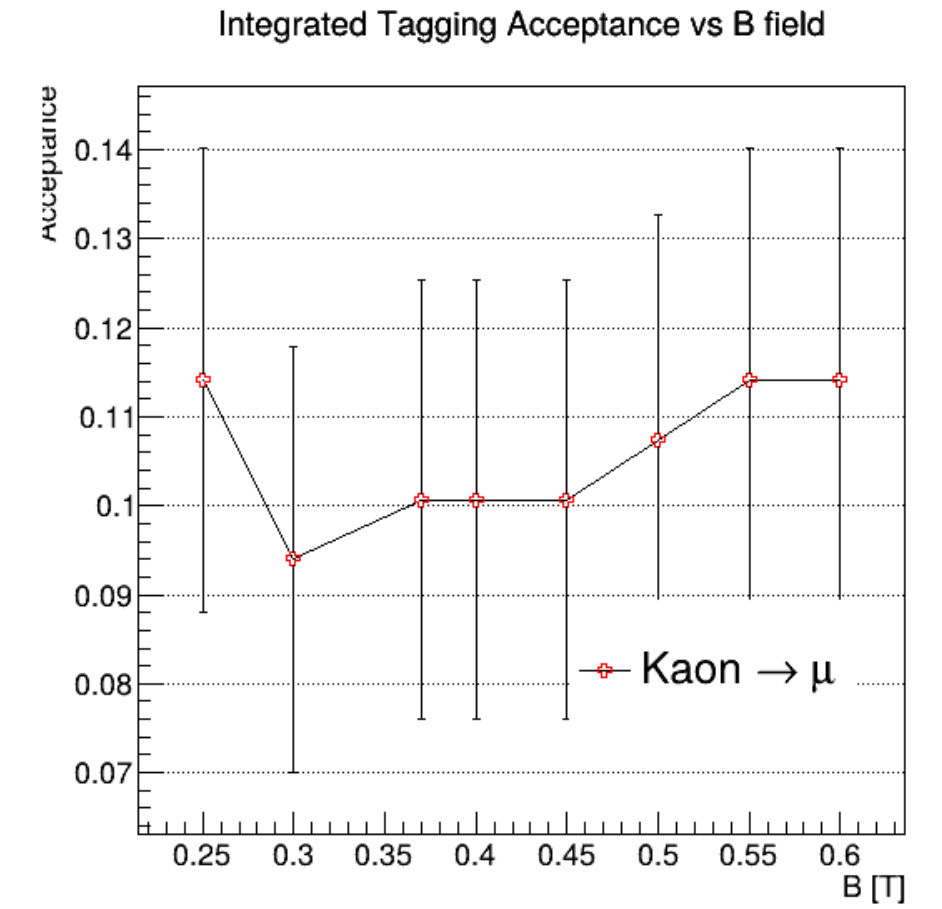

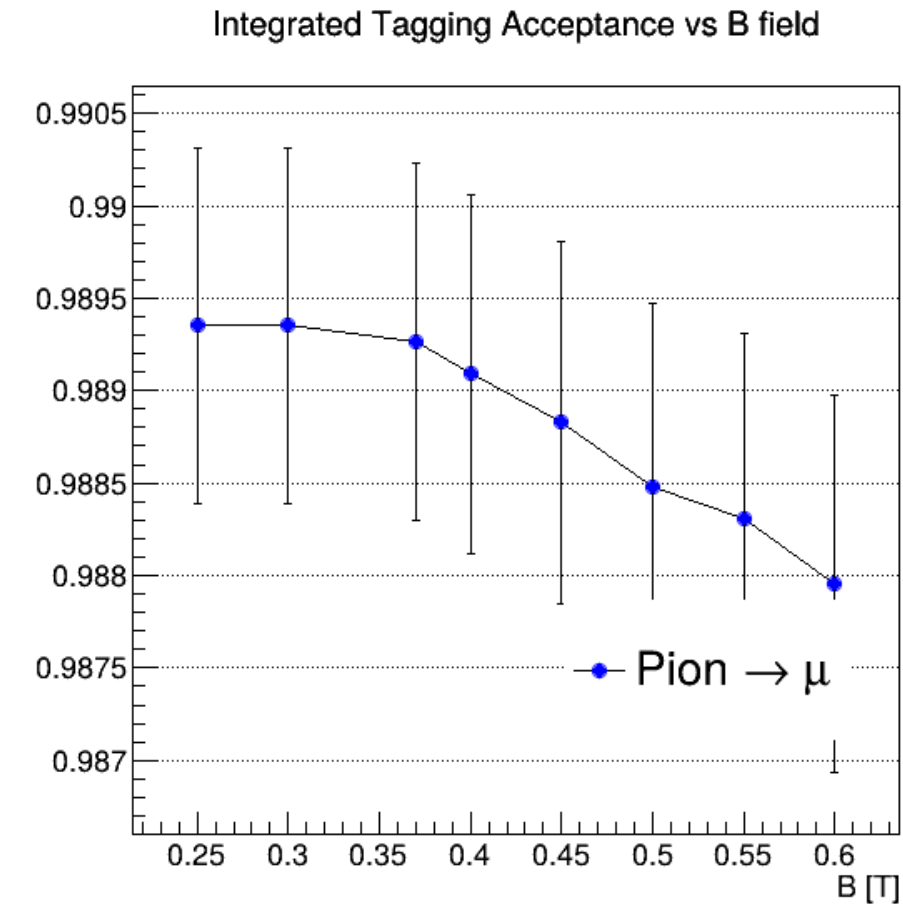

Objectives

- I am doing an internship with Mathieu and Julien in Neutrino - nuSCOPE project
- Optimizing the Muon Spectrometer in the nuSCOPE project

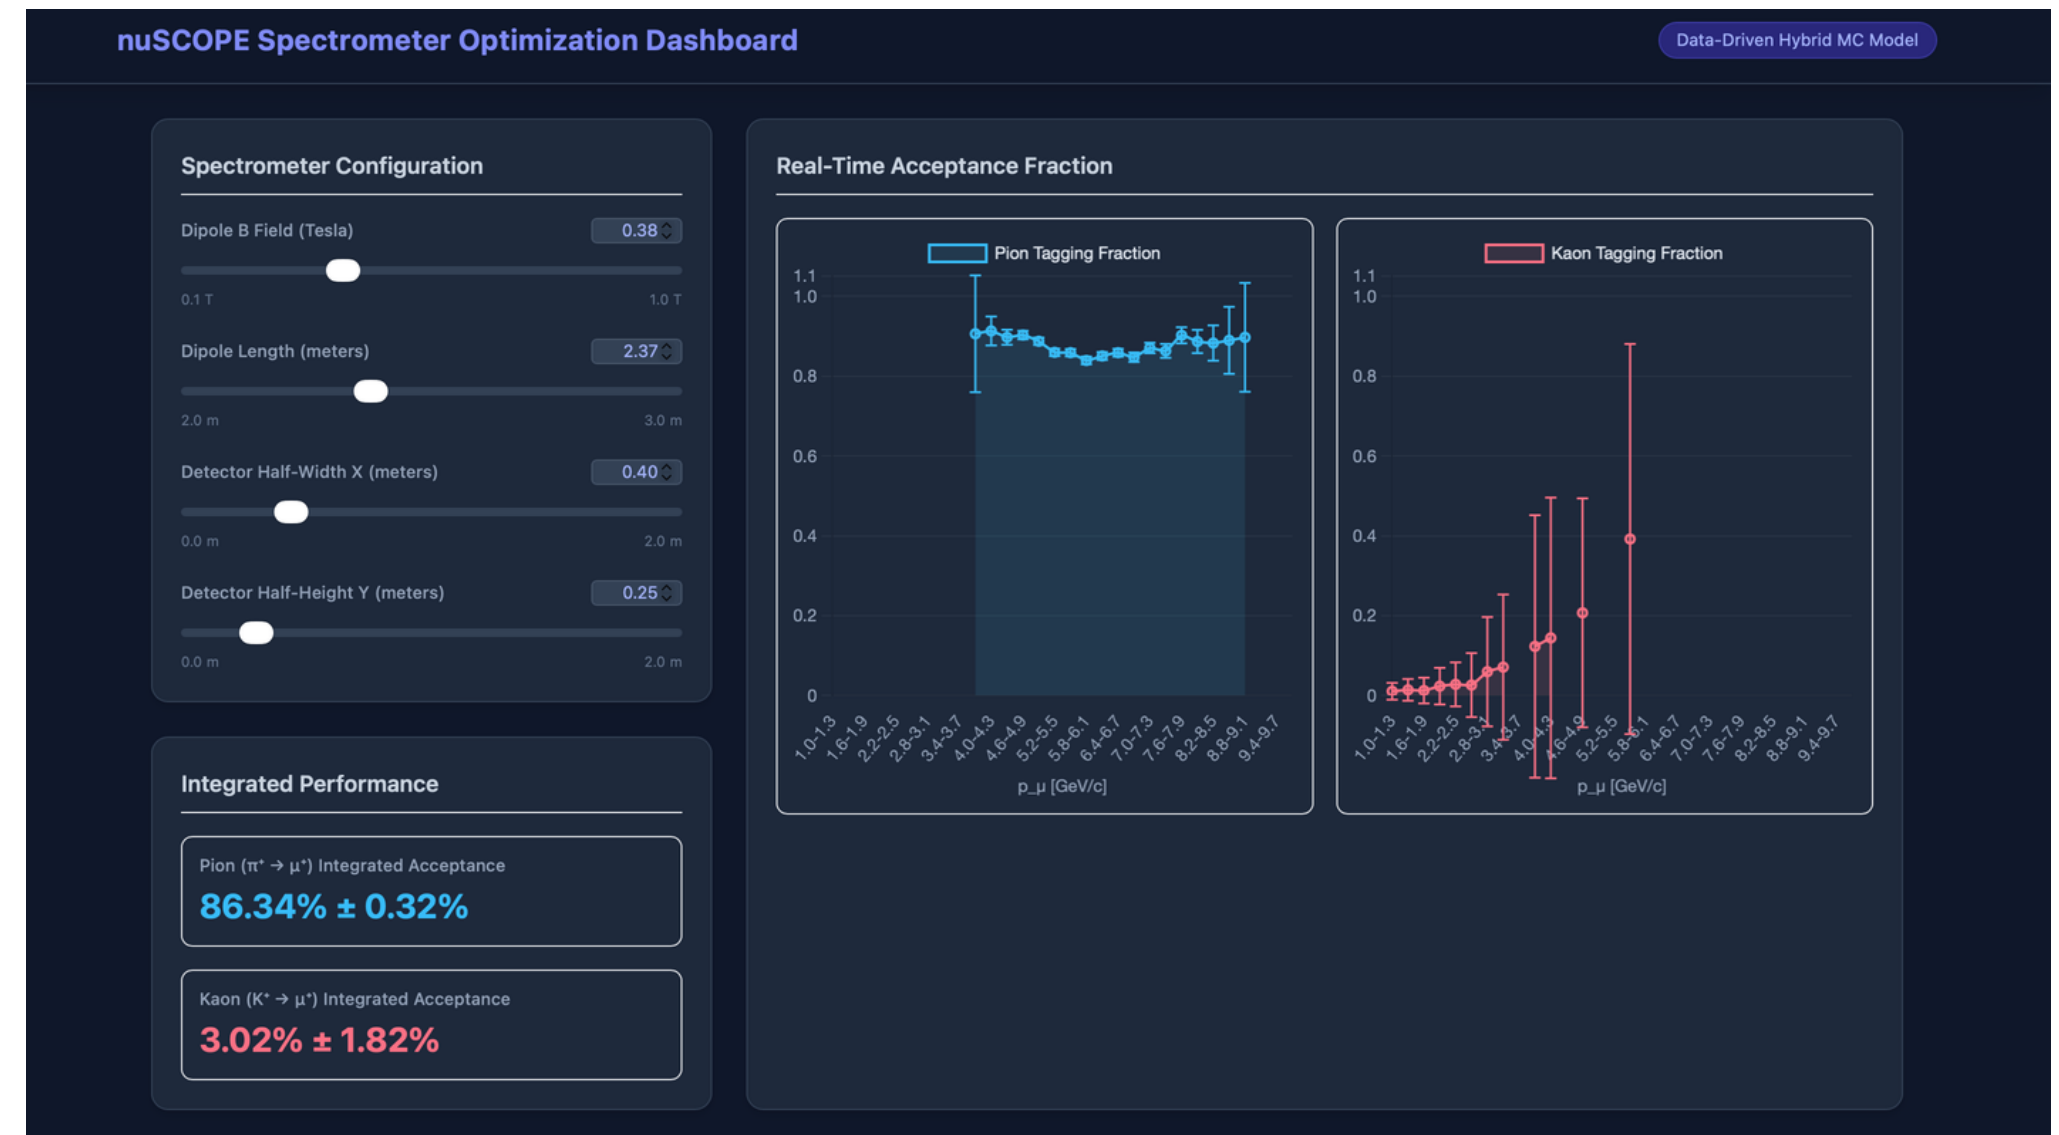

- How will the Muon Spec Acceptance change when we vary the detectors' sizes and the Dipole Magnetic field

Results...

- Also this is an interactive Website based on the objectives of the project, that we make in Nico and Julien workshop on using AI

Into the future

- I will start my Master 1 in Physics at AMU very soon, and I hope I can continue to work on the project during my study.
- For my further future: I hope I can meet my friends from the MUSI program in some international conferences in the future :)).
 - It will be a very epic reunion

Friendship

**“No one comes into your life by chance. Every person you meet has a reason, a lesson, or a blessing”
I hope fate can let us meet once again in the future**

Thank you for listening

- Thank you Mathieu and Julien for being the greatest supervisors I could ever have
- Thank you Cristi and the MUSI's teachers for arranging interesting lessons for us
- *Thank you Bérénice for making all of this possible*
