ESCAPE Collaboration Website Update

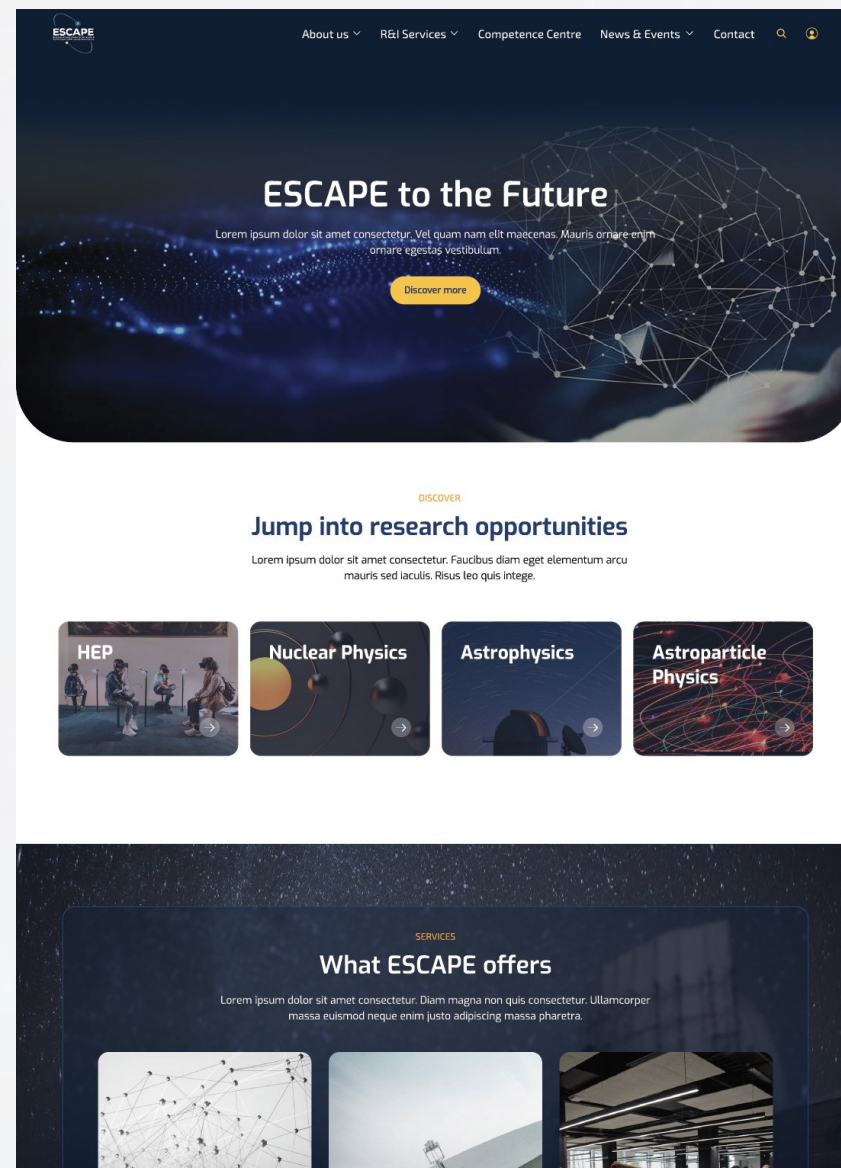

Current Status:

- ESCAPE EU Project website still online (<https://projectescape.eu>)
- Agreement with Trust-IT to update content management framework version, improve layout and add some functionalities
- Multiple meetings ongoing with the web development team
- Ongoing reorganization of the content

What should be highlighted in the new website:

- The Open Collaboration: Work Programme, member ESFRIs/Pan-European RIs, Open Science)
- EOSC-oriented (links to CERN Node, current and future thematic and national nodes that serve our RI communities)
- ESCAPE Working Groups
- ESCAPE Competence Centre, R&I services
- Acknowledge role in past and current projects (ASTERICS, ESCAPE, EOSC-Future, OSCARS, EVERSE...)

Next Steps:

- Finalise a first version (online mid October)
- Gather feedback from the EB (e.g. missing or outdated content)
- Add new content
