

Inclusive jet and dijet cross-section measurements in CMS

jeudi 21 juillet 2011 09:45 (15 minutes)

We present inclusive jet and dijet cross-section measurements in proton-proton collisions at a center-of-mass energy of 7 TeV at the CERN LHC, using the 2010 data collected by the CMS experiment. The data are compared to NLO pQCD predictions and are found to be in good agreement.
