

Neutrinos and the Flavour Puzzle: A Mini-Review

vendredi 22 juillet 2011 17:40 (20 minutes)

What is the origin of the observed fermion masses and mixing parameters? Neutrinos, with their small mass and large mixing, contribute an important part of this flavour puzzle. Could they possibly also provide the key towards its solution? We review the present status and discuss some recent developments regarding the flavour puzzle, from the neutrino physics perspective.
