

Summary

- ▶ Thanks for your contribution

- ▶ **DIRAC project is entering a new phase**
 - ▶ More and more communities are getting interested:
 - ▶ BES
 - ▶ SuperB
 - ▶ EGI
 - ▶ ...
 - ▶ There are different use cases
 - ▶ Modular and extendable framework to implement distributed computing models for a large user community with specific requirements.
 - ▶ Flexible and reliable tool to provide access to heterogeneous resources: Grids, Clouds, Clusters, etc. for smaller communities.
- ▶ **Requires changes in the development/support model**

- ▶ Documentation
 - ▶ We are working on it
 - ▶ Your contributions are welcome
 - ▶ Many levels
- ▶ Virtual Machines / Clouds
- ▶ Workflows
- ▶ Handling of Job Groups
- ▶ Merging of Outputs
- ▶ Request Management
- ▶ Interfaces (python/portal/scripts)
- ▶ Turn around time of fixes
- ▶ Testing framework

- ▶ It has been very useful for us
- ▶ We hope it was useful for you
- ▶ What can be the periodicity: 6 month? 1 year?
- ▶ We are open to face to face discussion at any time
- ▶ Thank you
