

Fall meeting of the GDR PH-QCD: nucleon and nucleus structure studies with a LHC fixed-target experiment and electron-ion colliders

mardi 18 octobre 2011

Open session of working group 3 on pA and AA collisions - Salle des conseils (14:15 - 18:40)

-Présidents de session: François Arleo; Ingo Schienbein

time	[id] title	presenter
14:15	[35] Heavy-flavour and quarkonium studies in CMS	DAHMS, Torsten
14:45	[36] Quarkonium studies in ALICE	SUIRE, Christophe
15:10	[38] Open heavy-flavour in ALICE	CONESA DEL VALLE, Zaida
15:30	[37] Heavy quark energy loss: lessons from RHIC and early LHC	GOSSIAUX, Pol-Bernard
15:55	Coffee break	
16:25	[43] χ_c production in Pb-Pb collisions at the SPS with CHIC	Dr FLEURET, Frédéric
16:45	[41] J/psi Nuclear Suppression from Parton Energy Loss	Dr PEIGNE, Stephane
17:10	[39] Cold Nuclear Matter Effects on Quarkonium production	Dr FERREIRO, Elena
17:35	[40] Probing nPDF through gamma+Q production	STAVREVA, Tzvetalina
17:55	[42] Discussion session
