Selected contributions (2) - Chair: J. Gerl (16:20 - 18:20)

time	[id] title	presenter
16:20	[106] On the present status of the DIAMANT upgrades	Dr NYAKÓ, Barna
16:35	[107] On the use of charged-particle detectors with gamma-ray spectrometers: Past, present and future.	Dr GALINDO-URIBARRI, Alfredo
16:50	[108] Neutron multiplicity filter NEDA - properties of the BC501A and BC537 scintillators	M. JAWORSKI, Grześ
17:05	[109] Electron conversion spectroscopy at Heavy Ion Laboratory in Warsaw	Dr PERKOWSKI, Jaroslaw
17:20	[110] High-spin high-seniority states in 119-126Sn	Dr ASTIER, Alain
17:35	[111] Lifetime measurement of high-lying short-lived states in 69As	Mme MATEJSKA-MINDA, Magdalena
17:50	[112] Prompt in-beam gamma-ray spectroscopy of Rutherfordium 256	RUBERT, Jérôme
18:05	[113] Limits of prompt in-beam conversion electron and gamma-ray spectroscopy of transfermium nuclei	Dr SANDZELIUS, Mikael
